

About This Guide

VP-2009 is an H.264 based broadband videophone supporting Video and Voice applications. Its major functions include IP Telephony, IP Camera Viewer (SIP based) and Photo frame. It can satisfy the demanding requirements of the next generation of IP broadband communication applications and open the door to the world of multimedia.

VP-2009 is an innovative IP media phone equipped with the most advanced video compression technology. It offers unrivalled super voice and picture quality, innovative functional richness, friendly user interface, stylish and elegant design, enhancing the instant, face-to-face communication experience even at low bandwidth.

Meanwhile it supports Voice Mail, Screen Saver, Advertisement, etc. Which make it not only a video phone but also a media phone for entertainment. It is definitely ideal for multimedia communication, virtual office and all IP video conversation for business or family users.

In this User Guide, you will find everything you need to quickly use your IP Video Phone. Be sure to verify with your system administrator that your network is prepared for configuring your IP phone. As well, be sure to read the Packing List section in this guide before you set up and use the phone.

Declaration of Conformity

Hereby, it's declared that this phone is in conformity with the essential requirements and other relevant provisions of the CE, FCC.

CE Mark Warning

This is a class B device, in a domestic environment; this product may cause radio interference, in which case the user may be required to take adequate measures.

WEEE Warning

To avoid the potential effects on the environment and human health as a result of the presence of hazardous substances in electrical and electronic equipment, end users of electrical and electronic equipment should understand the meaning of the crossed-out wheeled bin symbol. Do not dispose of WEEE as unsorted municipal waste and have to collect such WEEE separately.

Getting Started

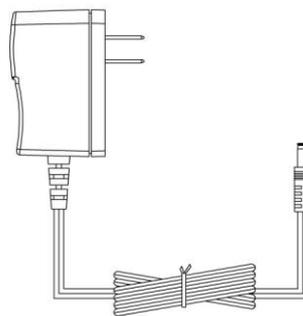

Packing List

The following components are included in your package:

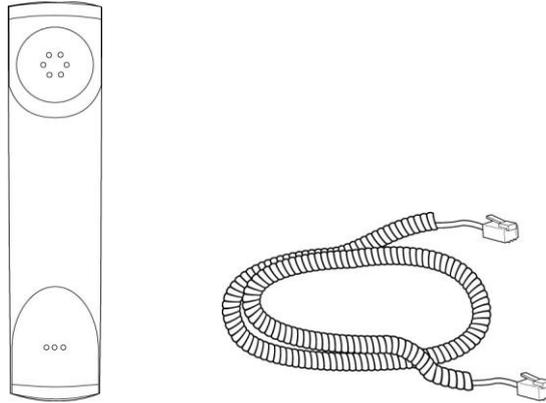

- IP Video Phone VP-2009

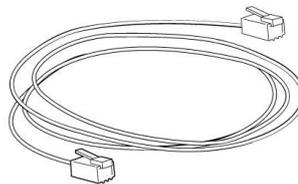

- Power Adapter

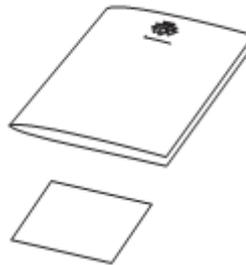

- Handset & Handset Cable

- Ethernet Cable

- Quick Installation Guide & Quick Reference

- CD Content

**Note:**

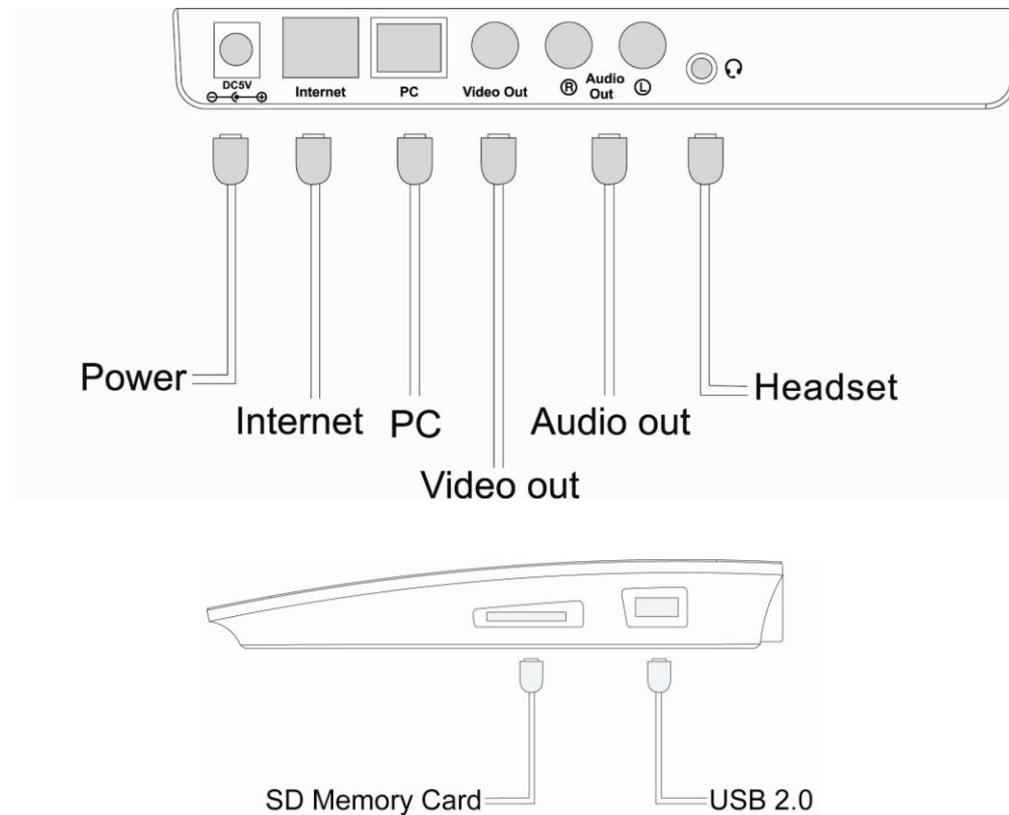

The telephone line cord is only available for the model VP-2009 with PSTN connectivity.

Please unpack the product package with caution; inspect the items closely. If you find any damaged item, please contact your IP Video phone reseller immediately. Also, please keep the box and packing material for future use in the event of future shipments.

Assembling the Phone

This section introduce how to assemble the phone.

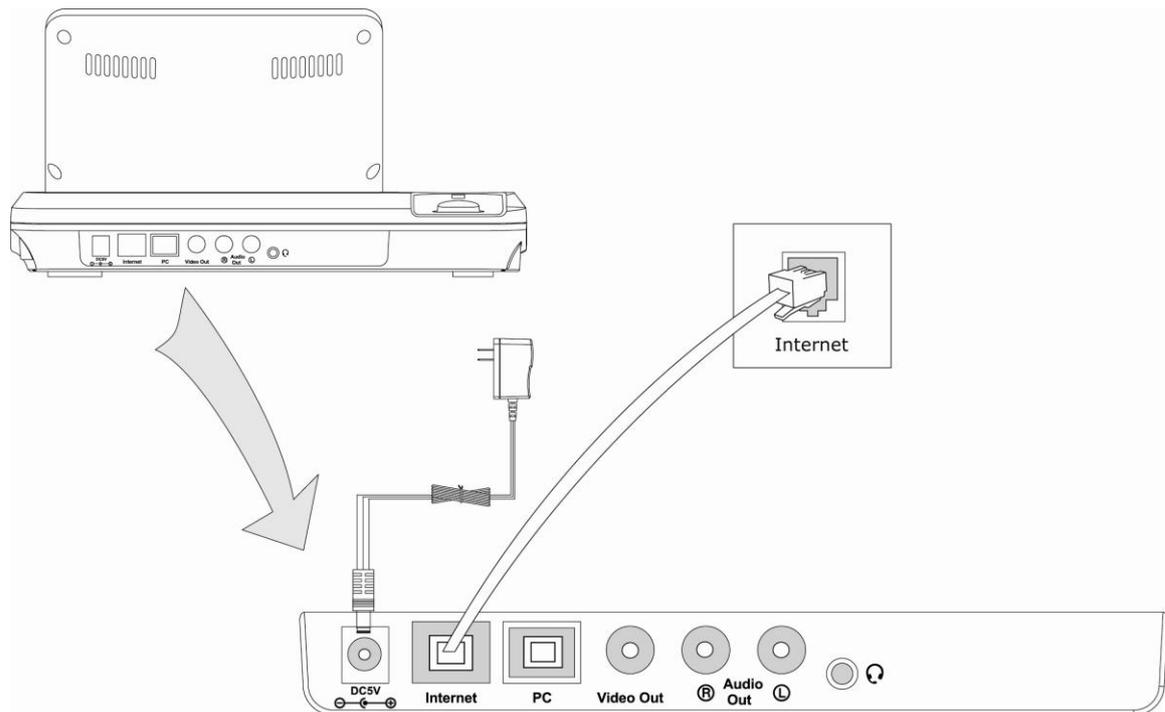

1) Connect the IP video phone shown as below:

**Note:**

Headset is not included in the packing list. Should be purchased separately.

2) Connect Network and Power

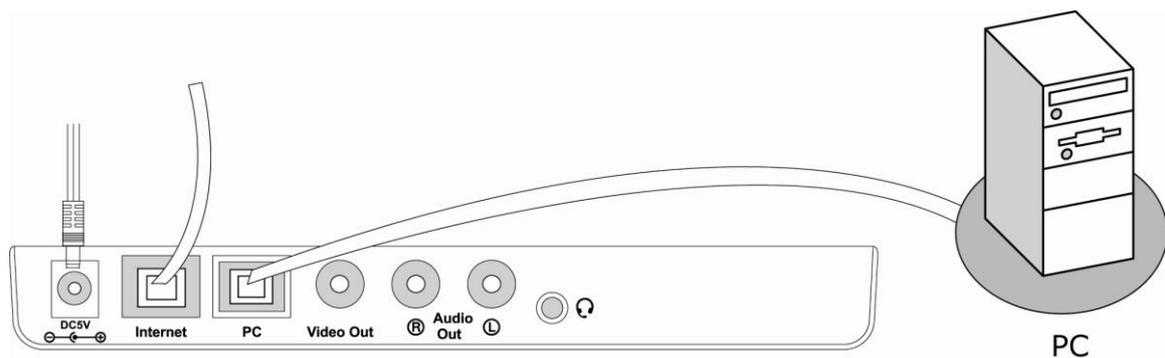

There are two ways for network and power source connections. You can connect the phone to the AC Power directly using the power adapter or to a PoE compliant switch or hub. Your system administrator will advise you on which one to use.

Note:

1. If inline power is provided, do not install AC adapter. Make sure the Ethernet cable and switch/hub is PoE compliant.
2. The Internet Port can be also connected to Hub/Switch/IP PBX or other internet devices.

The phone can also share the network connection with other network devices such as PC. Connect the phone's PC port and computer's Network Port together using an Ethernet cable, shown as below:

Configuration and Registration

If you are administrator, you need to do some simple configuration to make the phone work. If not, please contact your internet administrator or service provider for more details.

Configuring via Web Page

Press <OK> button on the keypad of the phone to enter the status page and find out the IP address of the IP video phone. Enter it (for example http://10.1.3.204) into the address bar of web browser. The default login name and password are **admin/admin**.

Note:

Please locate your PC in the same network segment of IP phone (10.1.3.X) to access the web configuration page. Please consult your system administrator for help.

Network Settings

Choose Network->Internet Port.

DHCP: By default the phone attempts to contact a DHCP Server in your network in order to obtain its valid network settings, e.g. IP address, sub mask, gateway, DNS server, etc.

Static IP Address: If your phone cannot contact a DHCP Server for any reason, you need to enter the network settings manually via Static IP Address. Please contact your internet administrator for more details.

PPPoE: If you are using the xDSL Modem, you can connect your phone to the internet via PPPoE mode. Please contact your ISP for the **User Name** and **Password** for internet access.

Note:

Using the wrong network parameters may result in inaccessibility of your phone and may also have an impact on your network performance. Please contact your network administrator.

Account Settings

The phone attempts to register to the SIP server using the account/register data provided by the automatic or manual initialization.

Choose Account, you will find the following parameters:

Field	Description
<i>Account Status</i>	You can choose on/off to enable/disable the account respectively.
<i>Display Name</i>	It is shown as Caller ID when making a phone call.
<i>User Name</i>	User account information, provided by VoIP service provider.
<i>Register Name</i>	It is authenticated ID for authentication, provided by ISP.
<i>Password</i>	It is provided by ISP for registration.
<i>SIP Server</i>	Server for registration, provided by ISP.

When you have finished the Network and Account Setting configuration, the Register Status Icons will be shown in the idle screen:

Register successfully

Register failed

Note:
Should the IP PBX (SIP register) require an authentication, you will be prompted to enter the correct password. Make sure you are using the appropriate input method or enter the password via the web user interface.

Configuring via keypad

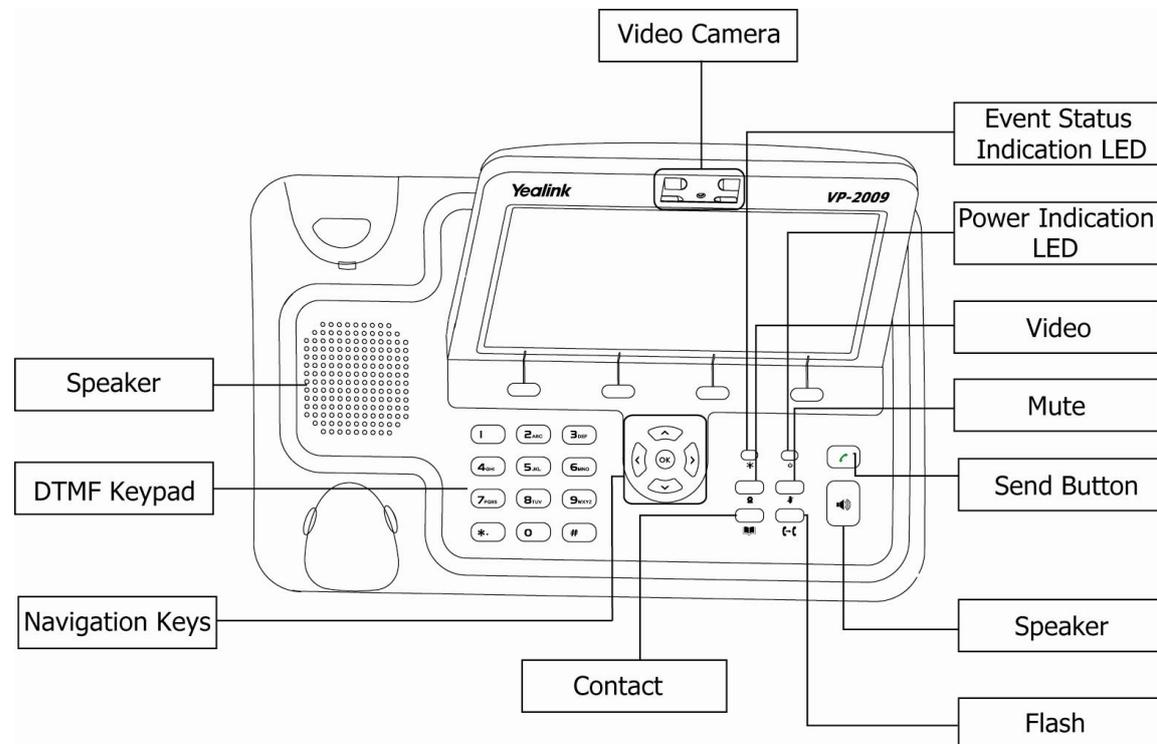

Network Settings: Click Setting->WAN Option to enter the internet relating configuration page.

Account Settings: Click Setting->Account to configure the account.

You can refer to the above "Configuring via Web Page" for the parameter details.

Overview

Keypad Instruction

You can check the following list which introduces the IP phone's keypad in detail:

Event Indication LED

It will show the event status of the video phone. It will blink when registration failed, the network is unavailable, there is a missed call or voicemail to the extension or hold/mute the call or firmware Update.

Power Indication LED

It will show the power status, it will be on if the phone is powered, off if the phone is power off.

Video Camera

Used for electronic motion picture acquisition.

Context-sensitive Soft keys

There are four soft keys: F1, F2, F3 and F4. Each key performs a specific function indicated by a corresponding icon displayed near the bottom edge of the screen. The specific function is assigned by the internal logic of the videophone and varies from menu to menu. For example, pressing a soft key corresponding to the Directory function will to enter the Contacts menu directly.

DTMF Keypad

The DTMF keypad is used for entering numbers, letters and symbols. In a situation where only numbers are expected, for example, when dialing a phone number, pressing a key will enter the corresponding digit. For example, pressing  will enter the number 2. In a situation where alphabet or symbol or both are allowed - when entering a URL address for example - you will need to press the same key repeatedly to reach the character you want. For example, pressing  two times will enter the letter a, followed by b, c and A, B, C in order. To enter alphabets in lower or upper case, you need to be in lower case mode or upper case mode, respectively. The current mode is indicated by one of the following icons shown on the LCD screen.

 : All letters and numbers.

 : Numeric.

 : Letters in lower case.

 : Letters in upper case.

Navigation Keys

Use the navigation keys to navigate in the display menus and confirm or cancel actions.

 : 1. Move to select a menu item or a menu entry.

 : 1. Move to select a menu item or a menu entry.

 : 1. Move to select a menu item.
2. During a call, increase the speakerphone volume.

 : 1. Move to select a menu item.
2. During a call, decrease the speakerphone volume.

 : 1. Confirm a selection.
2. Press this key at the idle page to check the status
3. During a call, press this key to put the active call on hold.

Hard Feature Keys

The feature keys provide a quick way to invoke a feature or a function.

-  : Press to turn on video privacy, the videophone start to send your video to the recipient. Press again to turn off video privacy;
-  : Mute audio transmission locally during calls;
-  : Allow users to access the Contacts page directly;
-  : 1. To transfer a call to a third party during an active conversation;
2. To active the DND mode.
-  : 1. Allow users to access the dialed list directly ;
2. In the Dialed list, press this button to dial out the chosen record;

Speakerphone Key

-  : This button is to let you make/answer a call in speakerphone mode, or switch between the speakerphone mode and handset mode during a call;

LED Instruction

Table 1 Event Indication LED

LED Status	Description
Blinking green	Power is on but there are some problems: registration failure, the network is unavailable or there is a missed call or message to the extension or hold/ mute the call or firmware Update. The detail will be displayed on the display (LCD or external display).
Off	There is no any abnormal status

Table 2 Power Indication LED

LED Status	Description
Steady green	Power on
Off	Power off

Icon Instruction

The IP Phone displays different kinds of icons on its LCD, you can refer to the following table for their meanings:

Icon	Description
	Network Status: Available
	Network Status: Unavailable
	Network Status: Limited
	Account register successful
	Account register failed
	Missed calls
	Call in
	Call out
	In handset mode
	In speaker mode
	In headset mode
	USB flash device detected
	SD memory card detected
	SD memory card is write-protect
	Call mute
	Call hold
	Voicemail
	Always forward
	Busy forward
	NO answer forward
	DND(Do not Disturb)

	Default 1
	Default 2
	Default 3
	Default 4

User Interface

There are two ways to customize specific options on your phones:

1. Using keypad and display on the phone;
2. Using web user interface in an Internet browser from your PC; please refer to "Configuration and Registration" to get into the web interface.

In many instances, it is possible to use both the user interfaces to operate the phone and change settings; some, however, are only possible via a phone or web user interface. Please refer to the following table for differences:

Note:

The above table only indicates most of phone functions rather than all of them. Please refer to the relating parts for more details.

User and Administrator Mode

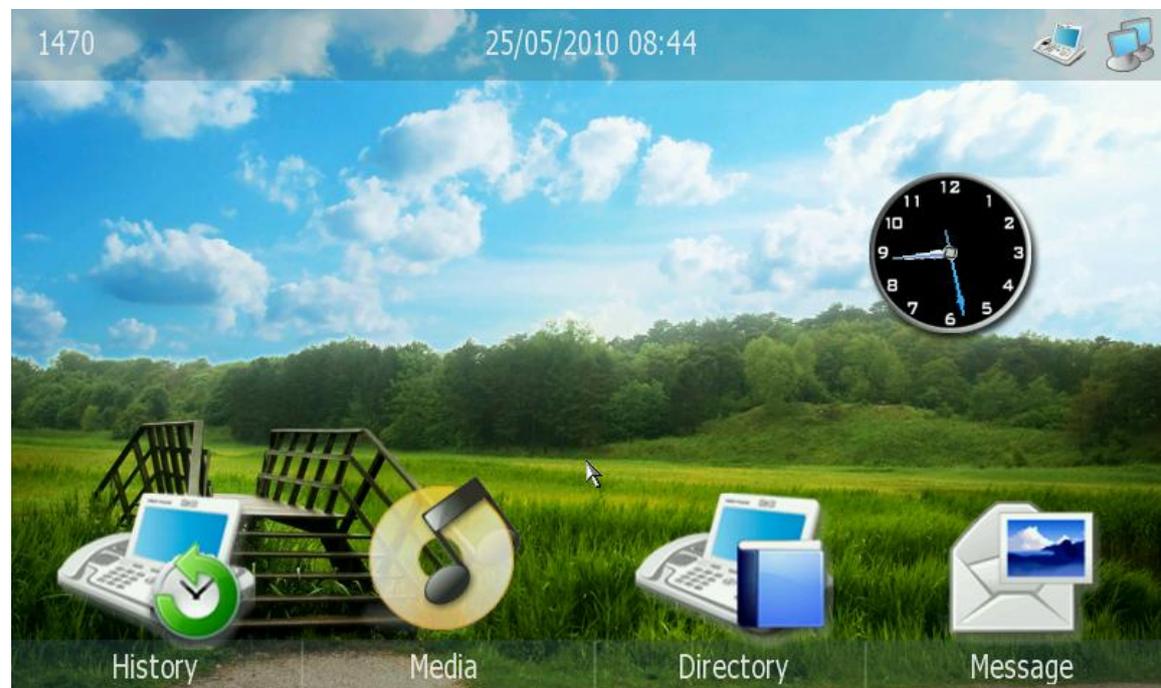

Your phone can be used in user or administrator mode. Administrator mode is the default setting with full configuration rights. The default administrator password is **admin**.

Customizing Your Phone

Powering Up the Videophone

- 1) Plug a Network cable into the network port.
- 2) Plug in power.
- 3) It takes about 2 minutes to boot up the videophone. During this period, please do not touch any keys or turn off the videophone.

The Idle Interface

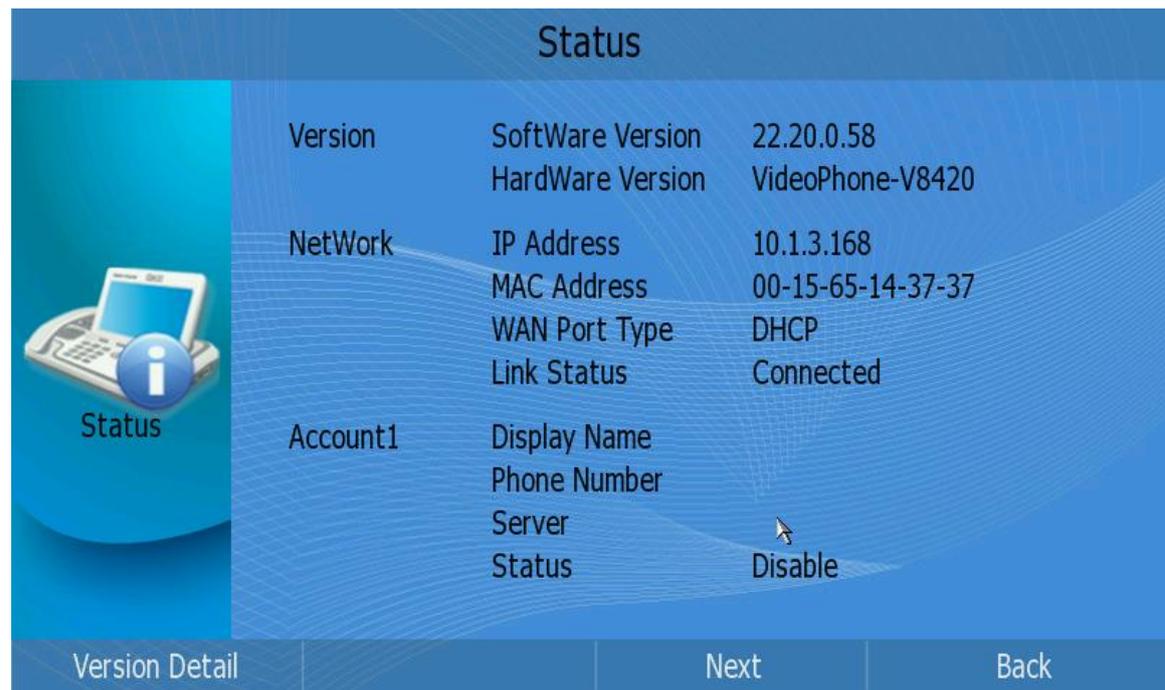

Check the Status

You can view the status of your phone using the phone interface or the web interface. You can review the following options:

- Version: Software Version, Hardware Version;
- Network: IP Address, Mac Address, WAN Port Type and Link Status;
- Accounts: Display Name, Phone Number, Server and Status;

To check the Phone Status via phone interface:

- 1) Click the Status option under the idle status.

- 2) Press the Next soft key to check the status of other accounts.
- 3) Press the Version Detail soft key to check the details of your version.

To view the Phone Status via web interface:

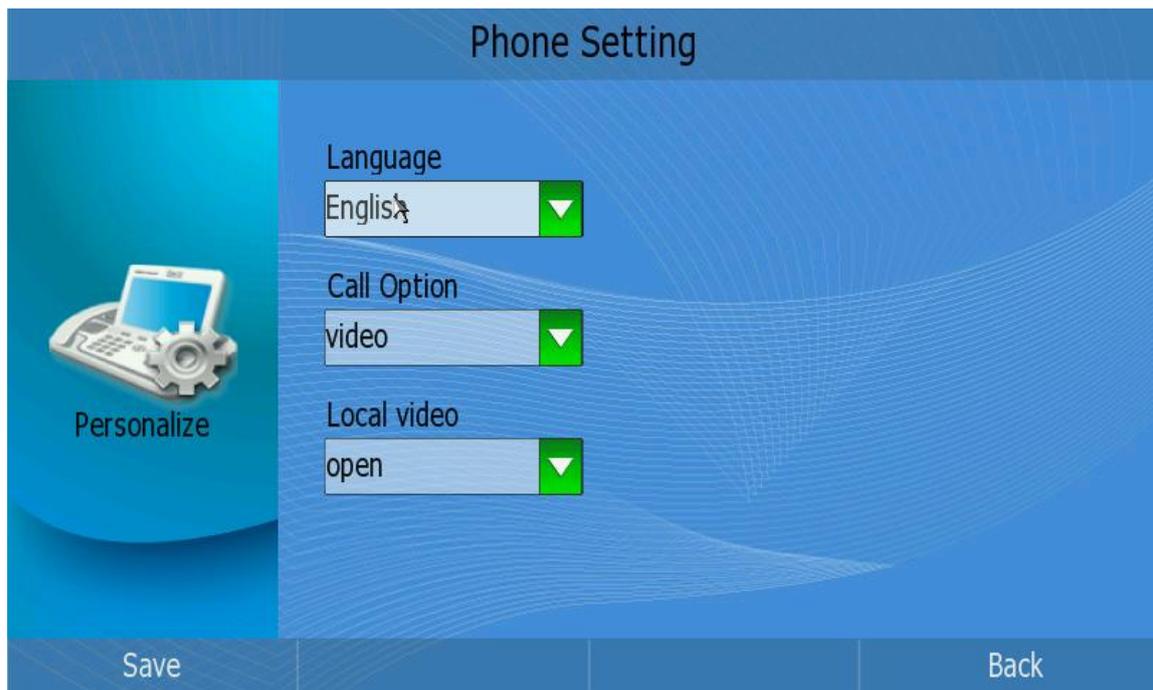

Open the web browsers and input the IP Address <http://WAN-ip-address>; Enter the account and password (default account and password is "admin"); choose Status directly to check the status.

Basic Settings

Personalize

This option includes the following parameters:

- Language: English, Simplified Chinese, Turkish, Korean and Russian, ect;
- Call Option: Voice or Video.
- Local Video: Open or Close.

Language

The default language is **English**.

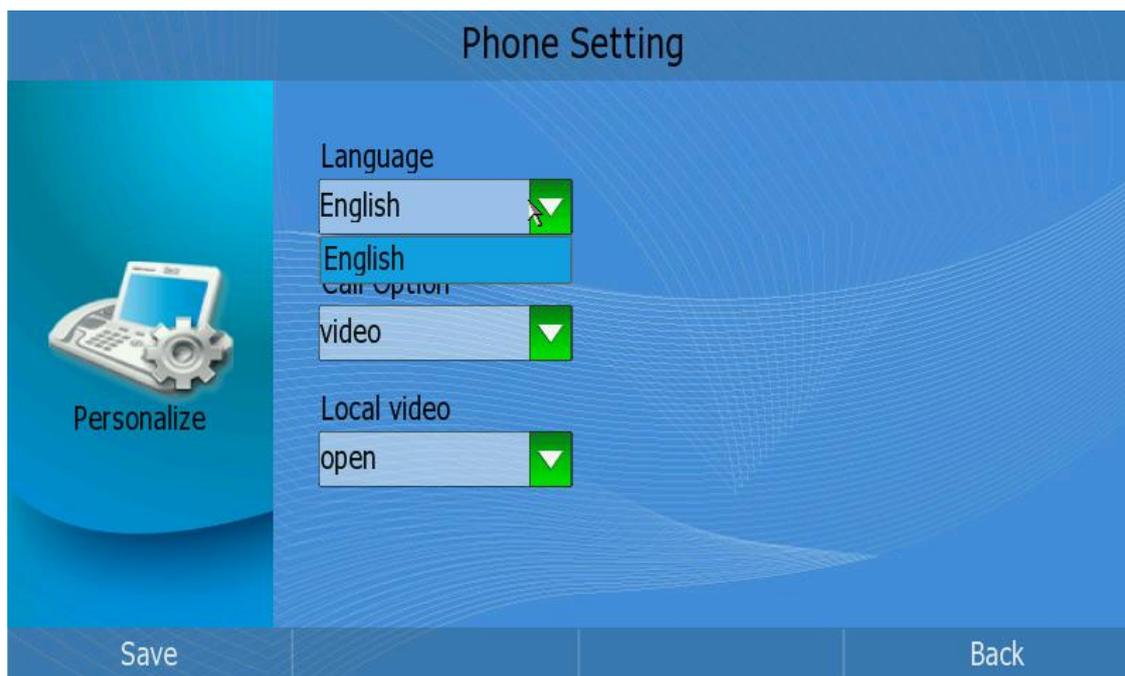

It can support English, Simplified Chinese, Korean, etc. You can change the language for the phone user interface and the web user interface independently.

Note:

The available languages depend on the language packs currently loaded to the IP phone. Please contact with your system administrator for more information about loading language packs.

To change the language via phone interface:

- 1) Click Setting->Personalize->Language.
- 2) Scroll through the list of available languages.
- 3) Press the Save soft key when the desired language is highlighted. The language appears on the graphic display will be changed to the one you chose.

4) Press Exit soft key to return to the previous screen.

Note:

The settings of **【Call Option】** and **【Local Video】** are the same as **【language】** .

To change the language via web interface:

Choose Phone->Personalize->language to do the relating changes. Please refer to the instruction above for the parameters' detail.

Note:

If you choose the different language, you need to reboot the phone .

Local Video

Define whether to open the local video.

To change the call option via phone interface:

- 1) Click Setting->Personalize.
- 2) Press Up/Down button to choose **【Local Video】** , press <OK> to pop up the pull-down menu, choose Open or Close as the default call mode;
- 3) Press <OK> to confirm the change;

Note:

When you close the local video , other can not see you but you can see the other side during the call.

Sound

You can set the ring tone and volume in this option.

Configure ring tone and volume via phone interface:

- 1) Click Setting->Sound option to enter.
- 2) Ring File: Click **Ring File** option to pop up the pull-down menu, press Up/Down to choose a preferred ring tone, then press <OK> to confirm the change;

- 3) Ring Volume: Choose **Ring Tone** -> **Volume** option, then click **+** or **-** button to adjust the ring volume;
- 4) Talking Volume: Choose **Volume** -> **Talking** option, then click **+** or **-** button to adjust the talking volume;

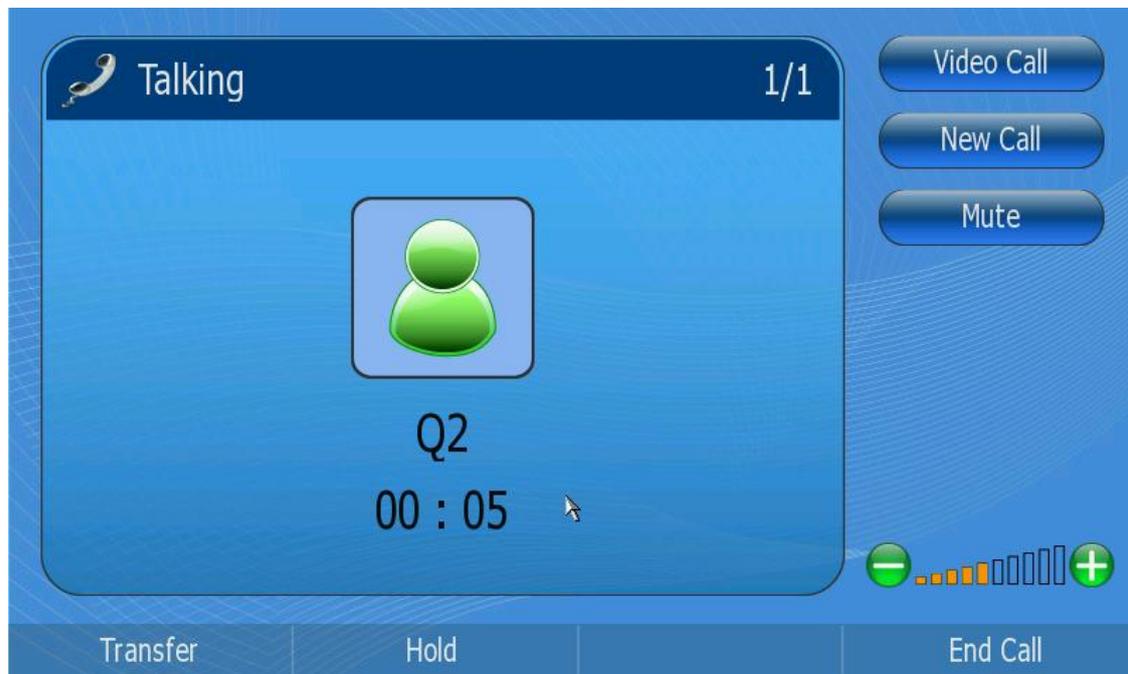

- 5) Press <F1> to save the changes, and get back to Setting page.

Note:

The ring tone also have priority. The priority is contact>group>phone default.

To adjust the volume when you are in an active call:

When Handset/Headset/Speakerphone mode is activated, click **+** or **-** button, or press the Left/Right navigation key to adjust to a comfortable level.

**Note:**

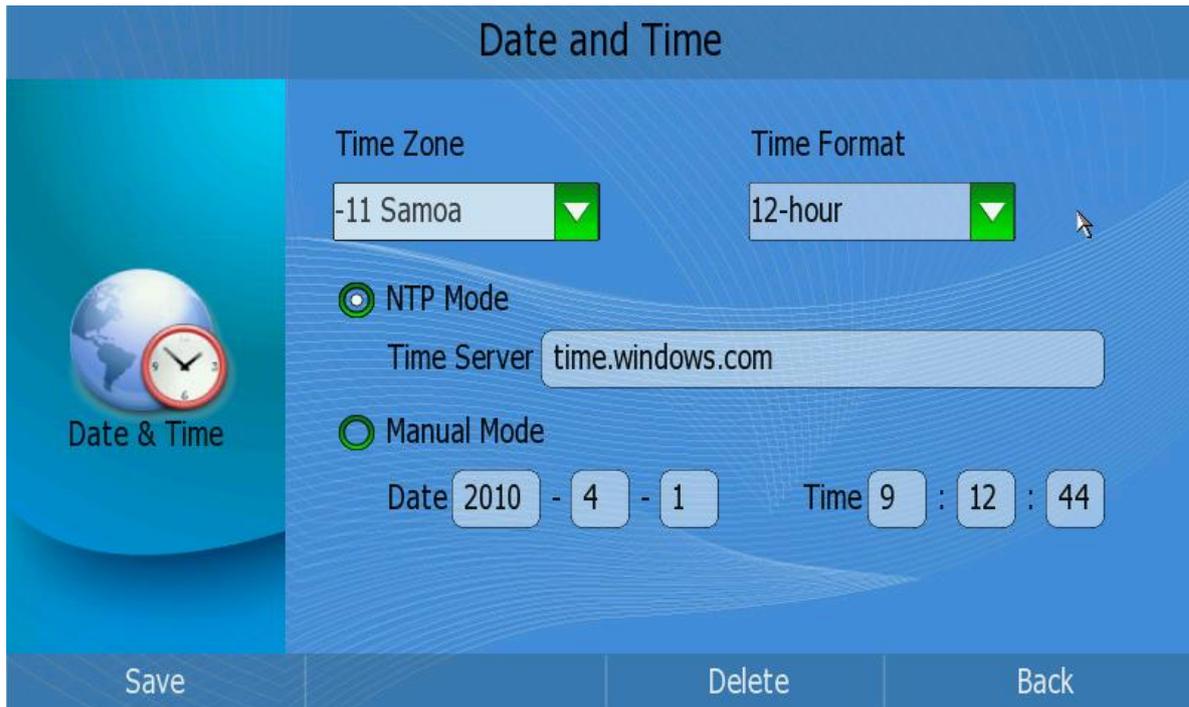

The volume can only be adjusted via phone interface.

Date & Time

The time and date appears on the idle screen of the IP video phone. If the phone can not obtain a time and date from the time server, please contact your system administrator to check whether the date and time server are correct. You can set the time manually or via the NTP server which is used to synchronize the time.

Configure Date and Time via phone interface:

- 1) Click Setting->Date & Time option to enter the configuration page.

- 2) Click the【Time Zone】option to pop up the pull-down menu, then choose the correct Time Zone in the list; Press <F1> button to save the changes;

Note:

You can follow the above steps to set Time Format.

- 3) Click the 【NTP Mode】 option, then choose and fill in the 【Time Server】 input box.
- 4) You can also set the date and time manually. Choose the 【Manual Mode】 option, then choose and fill in the 【Date】 and 【Time】 option.
- 5) Press Save soft key to save the changes, and get back to Setting page.

To change Time and Date via web interface:

Choose Phone->Preference to do the relating changes. You can also change the NTP Interval which specifies the time frequency that the phone refreshes the time automatically. Please refer to the instruction above for the parameters' detail.

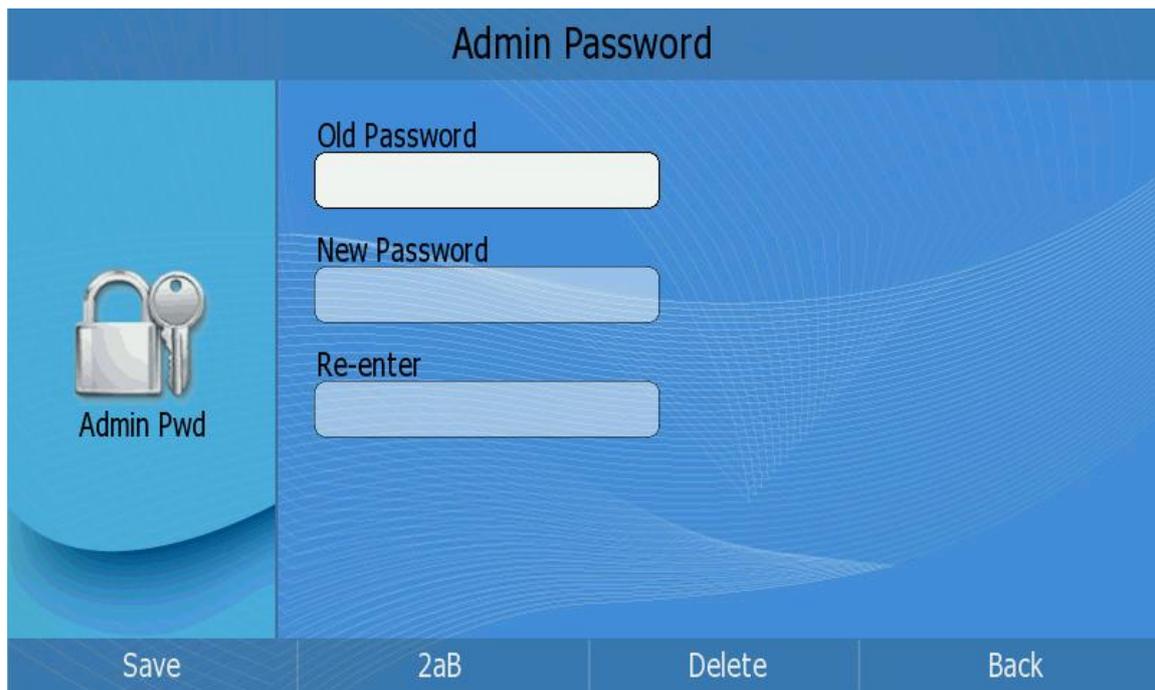

Note:

By default the time zone is **+8 China (Beijing)** , Daylight Saving Time is disabled.

Security

Configure Security via phone interface:

- 1) Click Setting->Security option to enter the configuration page.

Admin Password

Old Password

New Password

Re-enter

Admin Pwd

Save 2aB Delete Back

- 2) Choose and fill in the **【Old Password】**, **【New Password】** and **【Re-enter】** blacks. The default password is Admin.
- 3) Press <F1> to save the change, or press <F4> to cancel the operation and return to the "Setting Page".

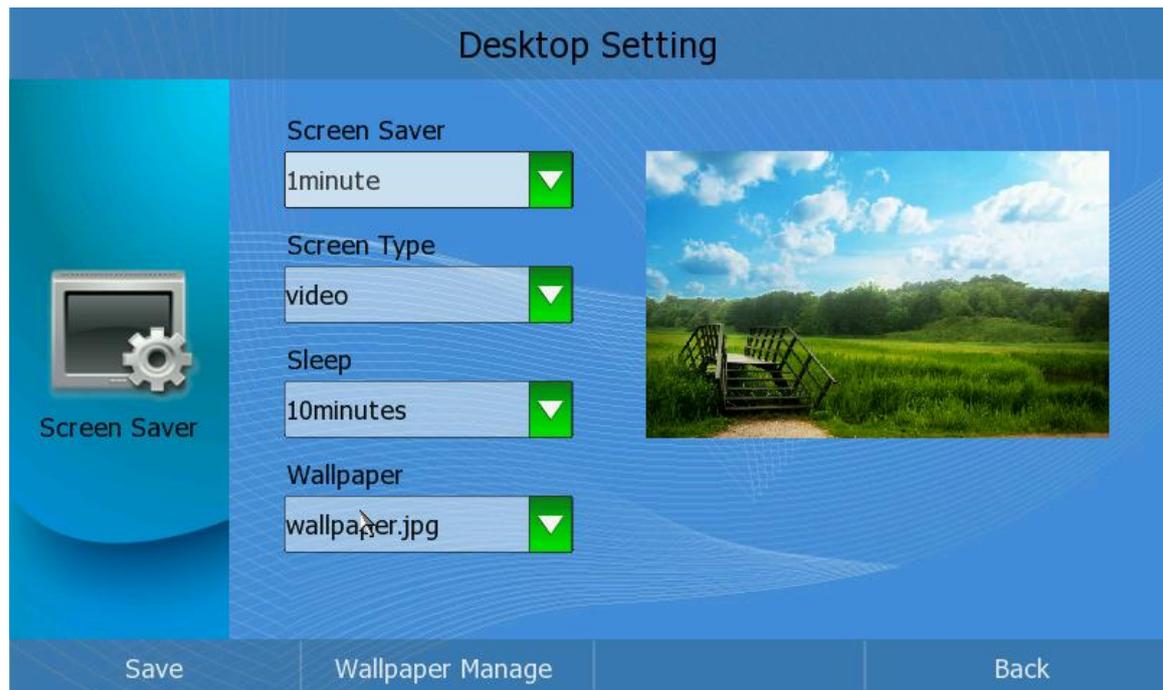

Screen Saver

In the Desktop status, click Screen Saver option to enter the configuration interface.

Screen Saver

Configure Screen Saver via phone interface:

- 1) Click Setting-> Screen Saver option to enter the configuration page.

- 2) Click the Screen Saver option, and choose the Screen Saver time in the pull down menu, then click the <F1> button to save your changes.
- 3) Follow the same way to choose and set the Screen Type and Sleep options.
- 4) Click the Wallpaper Manage option, and make your choice in the pull-down menu, the chosen picture will be shown on the right side for you. Then click the <OK> button to confirm your choice.
- 5) Press the Save soft key to save your changes.

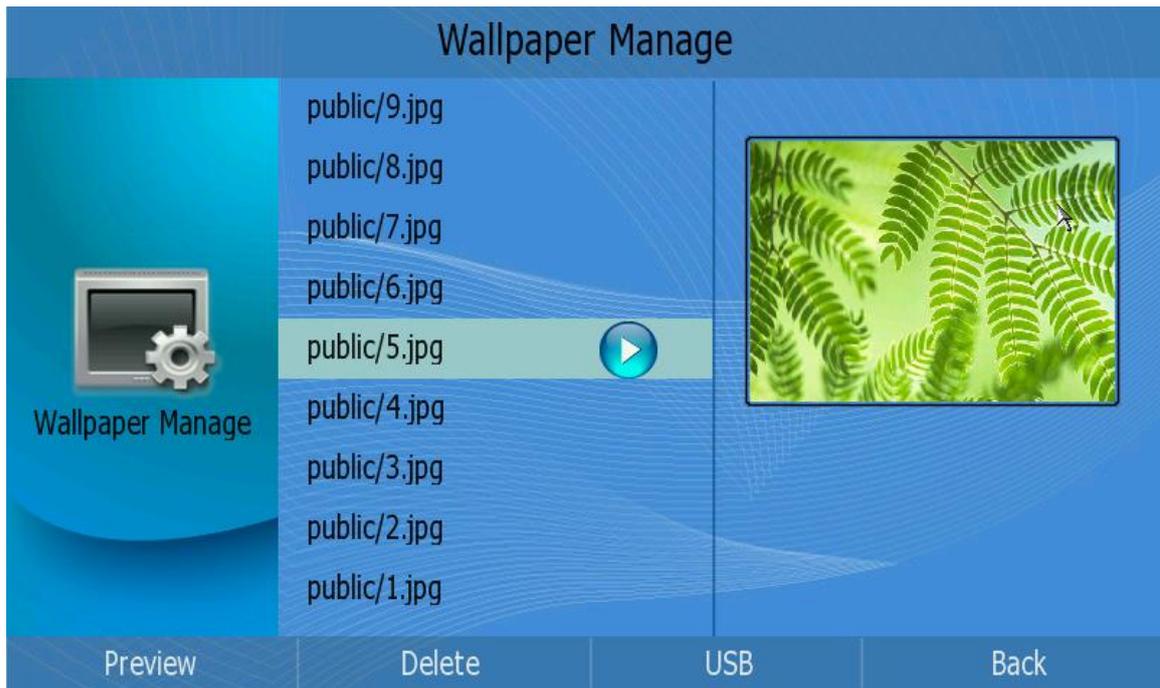

Note:

1. If there is USB flash device plugged into the USB port, and there is a AD folder under the root , and the folder of video files that meet the conditions, it will automatically play the video files in the USB after you opened the video screen saver, or manually play it.
2. In the Screen Type , it have video and photo type option, it will display the video file when you chosen the video type, else display the photo.

Wallpaper Manage

To manage the wallpaper via phone interface:

- 1) In Screen save page, Click Screen Saver option->Wallpaper Manage soft key to get into the Wallpaper Manage page;

- 2) Press <Up>/<Down> to preview the pictures.
- 3) <Preview>: To preview the selected picture full screen.
- 4) <Delete>: To delete the selected picture. If you have sufficient permissions, Click this button, it will pop up a warning frame, asking whether to delete it. Click  to delete, click  to cancel and return to the e-Photo Manage frame.
- 5) <USB >: If there is USB flash device plugged into the USB Port, the pictures stored in the USB flash device will be listed when <F3> button is pressed; Press <F1> to preview, <F2> to delete, <F3> to import.
- 6) <Back>: To exit and return to Desktop Setting page.

Call Feature

Forward

Call forward is a feature that redirects your incoming calls to another phone number when your phone is unavailable or you are inconvenient to answer it.

This feature allows you to forward an incoming call to another phone number .e.g, a cell phone or voice mailbox.

The IP video phone supports 3 kinds call forward options:

- *Always Forward*: Incoming calls are immediately forwarded.
- *Busy Forward*: Incoming calls are immediately forwarded when the phone is busy or refuse the call.
- *No Answer Forward*: Incoming calls are forwarded when the phone is not answered after a specific period.

To configure Call Forward via phone interface:

- 1) Click the following options to enter: Call Feature-> Forward.
- 2) There are 3 options: Always Forward, Busy Forward and No Answer Forward.
- 3) Choose one option, enter the phone number you want to forward to. And then press Save key to save the changes.

The screenshot shows a phone's 'Forward Setting' menu. The title 'Forward Setting' is at the top. On the left, there is a green icon of two phones with a red arrow pointing from one to the other, labeled 'Forward Setting'. The main area contains three radio button options: 'Always Forward' (checked), 'Busy Forward', and 'No Answer Forward'. Each option has a corresponding empty text input field to its right. Below these options is a 'Time' field with the value '60' and the range '(1-100s)'. At the bottom, there are three buttons: 'Save', 'Delete', and 'Back'.

To configure Call Forward via web interface:

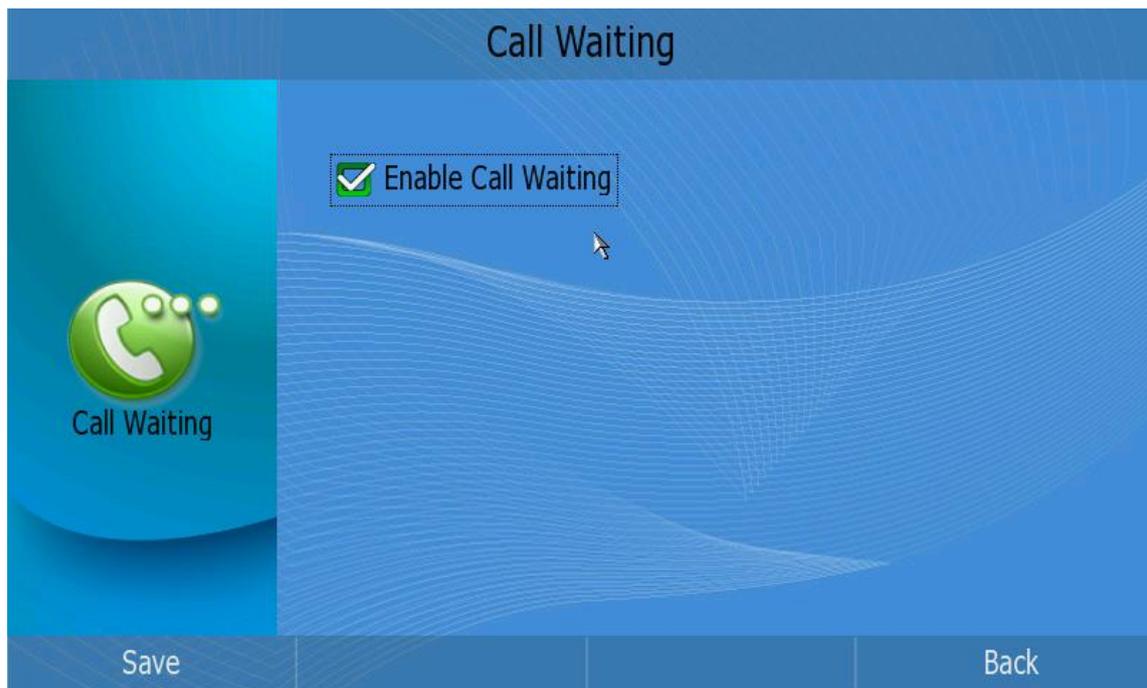

Choose Phone->Forward to do the relating changes. Please refer the above configuration information.

Call Waiting

Call Waiting lets you know who is calling you when you are busy. Don't feel like answering the other line? Don't worry, just let the call go to voicemail and respond at your convenience. With Call Waiting, you will never miss an important call.

To set call waiting function via phone interface:

- 1) In desktop status, click Call Feature->Call Waiting option to enter;

- 2) Click the icon  to enable/disable Call Waiting function;
- 3) Press <F1> to save the changes and get back to the "Call Features" page.

Note:

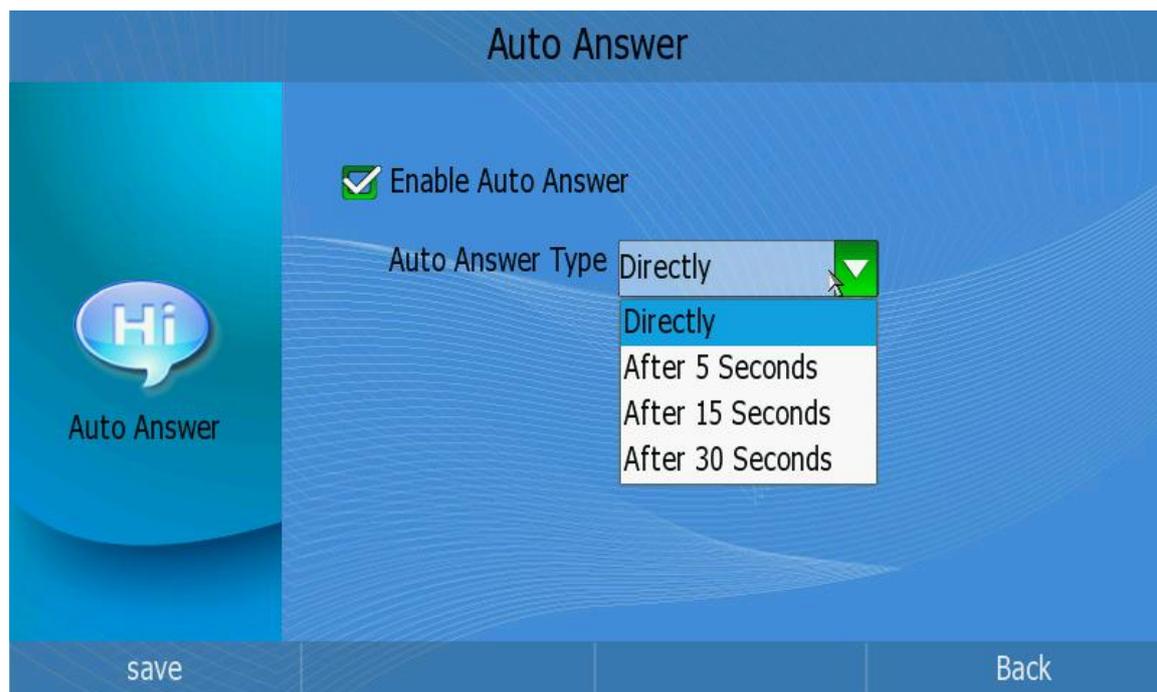

If Call Waiting is enabled by the called extension, when a new call is coming during an active call, the device will sound a "Du...", and the LCD indicates the incoming call, the caller will hear the ring back tone.

Auto Answer

A feature that enables your phone to accept incoming calls even if you are inconvenient. In auto-answer mode, it will establish a call whenever the telephone rings.

To set auto answer function via phone interface:

- 1) In desktop status, click Call Feature->Auto Answer option to enter;

- 2) Click the icon  to enable/disable auto answer function;
- 3) If auto answer is enabled, users can choose different types. Click the Auto Answer Type to pop up the pull-down menu and choose a proper type.
- 4) Press save key to save the changes and get back to the "Call Feature" page.

Note:

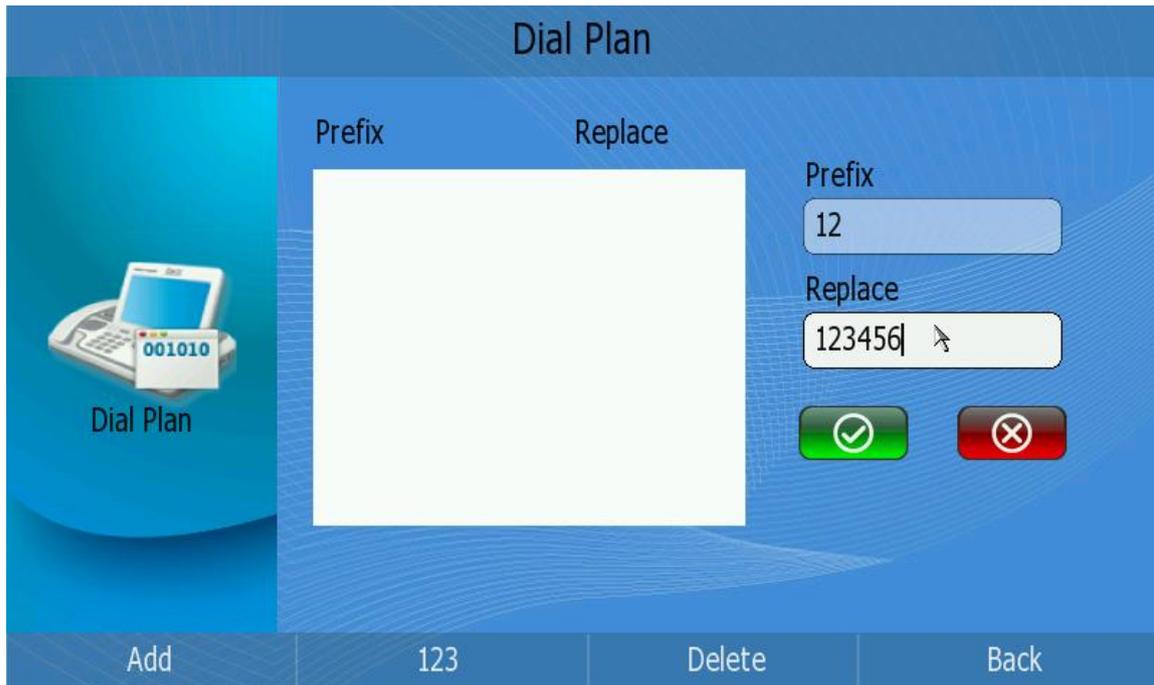

If the Auto Answer is enabled by the called party, when a new call comes in, the device will auto answer it after the specific period which is set in the Auto Answer Type.

Dial Plan

A dial plan establishes the expected number and pattern of digits for a telephone number. This includes country codes, access codes, area codes and all combinations of digits dialed. For example if you set the *Prefix* as 0 and *Replace* as 0086 (Chinese country code), when you dial 05702000 out, the number will be replaced by 00865702000 automatically.

To set dial plan rules via phone interface:

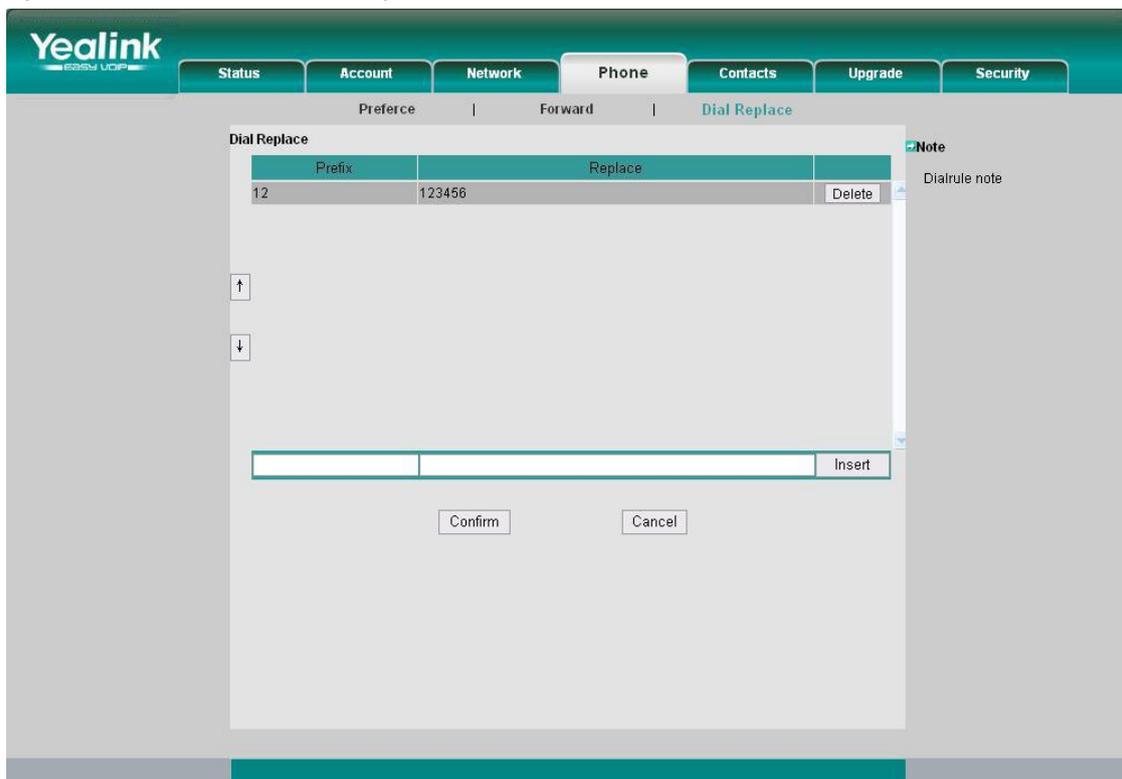

- 1) In desktop status, click Call Features->Dial Plan option to enter;

- 2) Press <F1> to add a record, enter "Prefix" and "Replace" parameters on the right, then click  to save the changes; Then the record will appear in the dial plan list on the left.
- 3) In the dial plan list, press Up/Down button to choose a dial plan record to edit, press <F3> to delete the record, and press <F4> to return to the "Call Feature" page.

To set dial plan rules via web interface:

- 1) Choose Phone->Dial Replace.

- 2) Enter the desired *Prefix* and *Replace*.
- 3) Press Insert button to add the rule .
- 4) Then click the confirm key to save the changes.
- 5) You can also delete a specific one from the Dial Replace list by clicking the Delete button.

Speed Dial

To set the speed dial via phone interface:

- 1) In desktop status, click Call Feature->Speed Dial to enter;

Speed Dial Setting

Key	Type	Account	Extension
DSS Key 1	Line	Line 1	
DSS Key 2	Line	Line 2	
DSS Key 3	Line	Line 3	
DSS Key 4	Line	Line 4	
DSS Key 5	Speed Dial	Line 1	2310

DSS Key 7	N/A		

Key: DSS Key 6

Type: Speed Dial ▼

Account: Line 1 ▼

Extension: 2311

✔
✘

123
Delete
Back

- 2) On the left, there are 20 DSS keys available, make your choice in the list.
- 3) On the right, set the Type, account and extension for the chosen DSS key.
- 4) For the Type option, Line and Speed Dial options are available for choose. The default configuration for each key is N/A which means the key hasn't been set for any functions.
- 5) This Video phone can support up to 4 accounts in the pull-down menu.
- 6) Click ✔ to save your changes.
- 7) Return to the idle status, and press the Left/Right navigation keys to the DSS keys page to check your configuration.

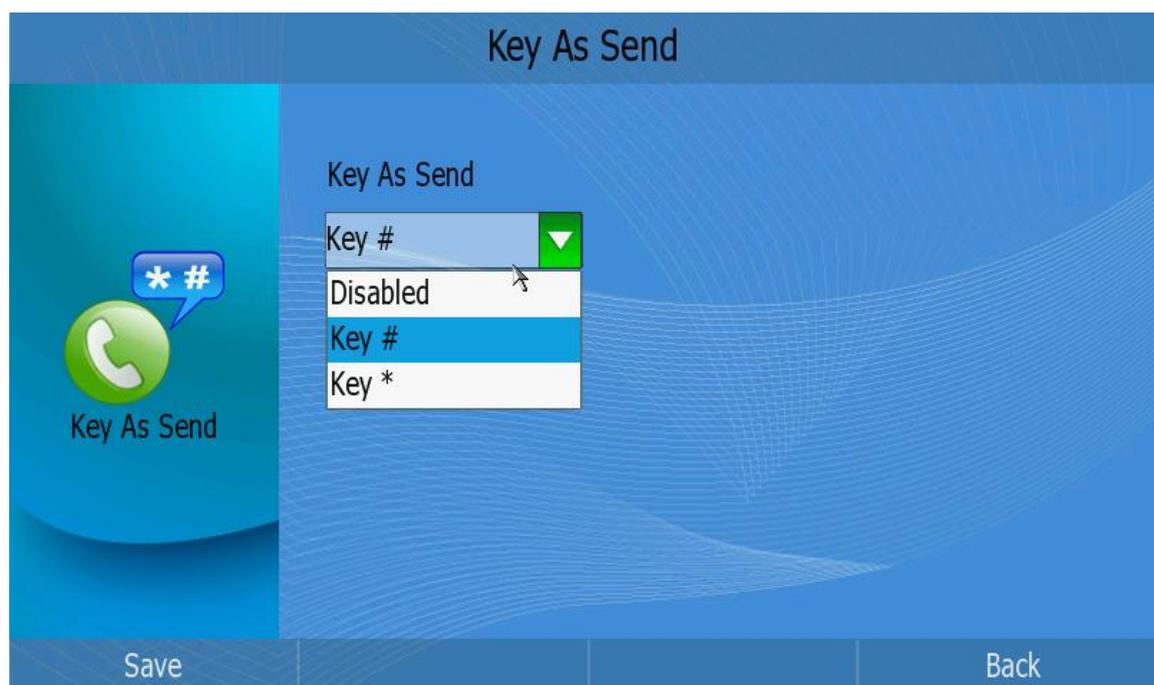

- 8) Click the corresponding Speed Dial Key to dial out directly. For example, click the 2310 button to call out directly.
- 9) Click the corresponding line key (for example 23) to enter the dial-up interface, enter the number to dial out.

Key As Send

Users can set a specific button ("#" or "*") to active as the send button.

To set the send key via phone interface:

- 1) In desktop status, click Call Feature->Key As Send to enter;

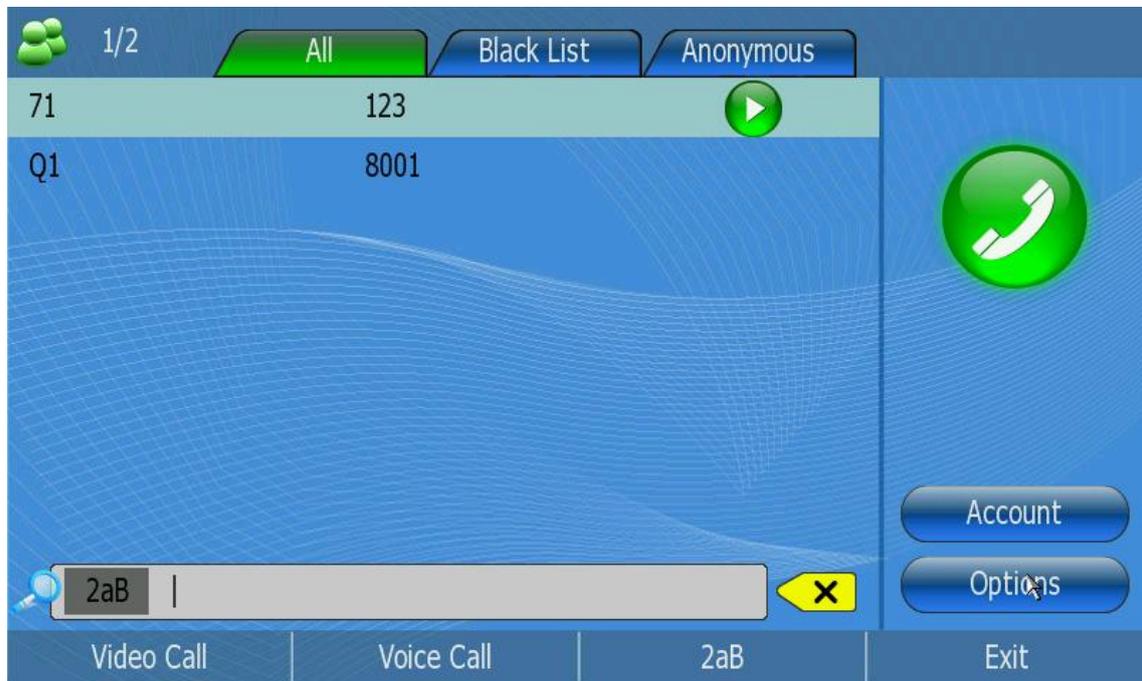

- 2) press <OK> to pop up the pull-down menu, and choose a preferred option, then

click the Save soft key to confirm the change;

Directory

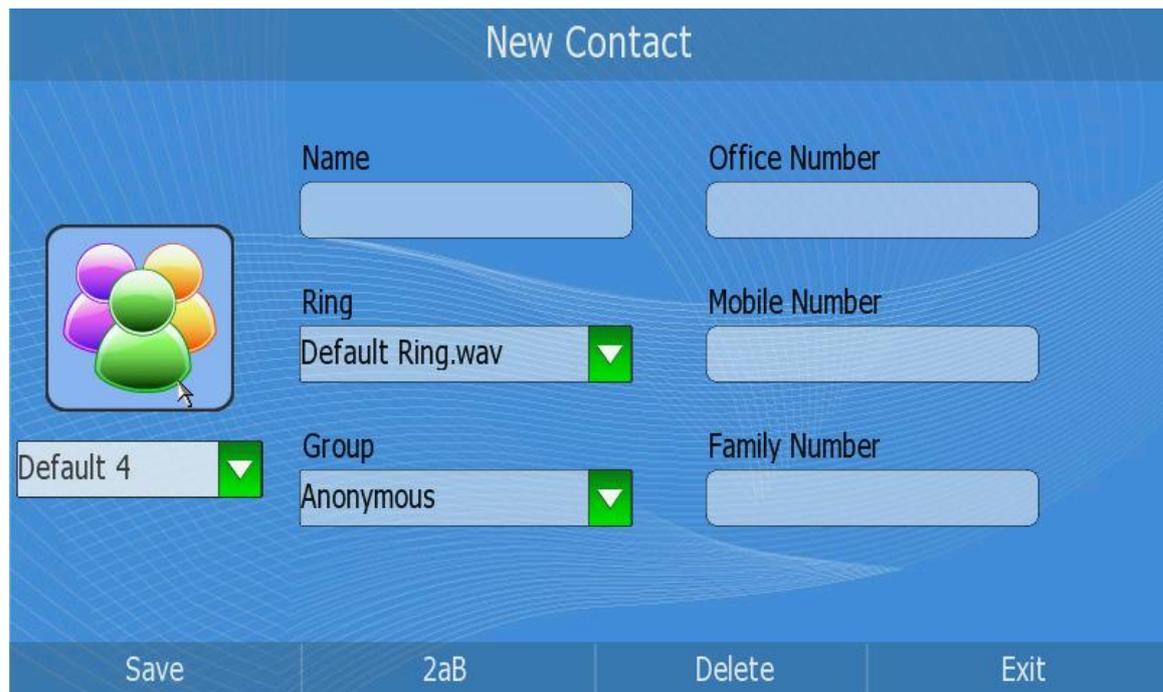

You can store a large number of contacts in the directory of your video phone's directory. You can add, edit, delete, dial, or search for a contact in this directory.

Add Contact

Search a contact via phone interface:

- 1) Click **Directory** -> **Options** -> **Add** option to enter the configuration page.

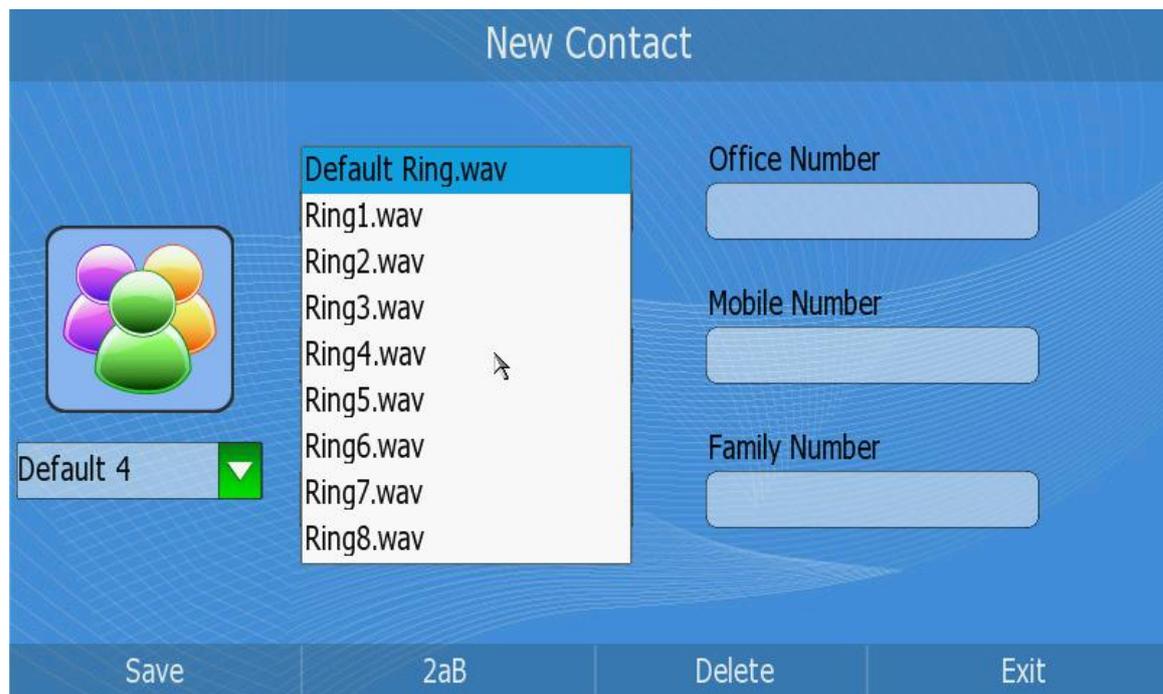

The screenshot shows the 'New Contact' screen with the following fields and options:

- Name:** Text input field.
- Office Number:** Text input field.
- Ring:** Dropdown menu with 'Default Ring.wav' selected.
- Mobile Number:** Text input field.
- Group:** Dropdown menu with 'Anonymous' selected.
- Family Number:** Text input field.
- Image:** A square icon containing five colored circles (purple, green, yellow, orange, red).
- Group Label:** 'Default 4' with a dropdown arrow.

At the bottom, there are four buttons: 'Save', '2aB', 'Delete', and 'Exit'.

- 2) Press Up/Down button to choose and fill in different options, in the **【Ring】** and **【Group】** options, press <OK> to pop up the pull-down menu, choose your preferred options, then press <OK> to confirm.█

The screenshot shows the 'New Contact' screen with the 'Ring' dropdown menu expanded. The menu lists the following options:

- Default Ring.wav
- Ring1.wav
- Ring2.wav
- Ring3.wav
- Ring4.wav
- Ring5.wav
- Ring6.wav
- Ring7.wav
- Ring8.wav

The other fields and buttons are the same as in the previous screenshot.

- 3) Select an image for the contact.

4) After the edition, press <F1> to save the changes and get back to the previous page.

Note:
You can not save a record when all of the input frame is empty.

Add a contact via web interface:

1) Choose Contacts.

Display Name	Office Number	Mobile Number	Family Number	Group Name	Delete
aqw	5685	8745	4656	Black List	Delete
71	123	123		Anonymous	Delete
Q1				Anonymous	Delete
aa	1456	1456	1456	Anonymous	Delete
az	365	365	256	Anonymous	Delete
asd	456	12123	1321	family	Delete
qwe	258	258	258	family	Delete

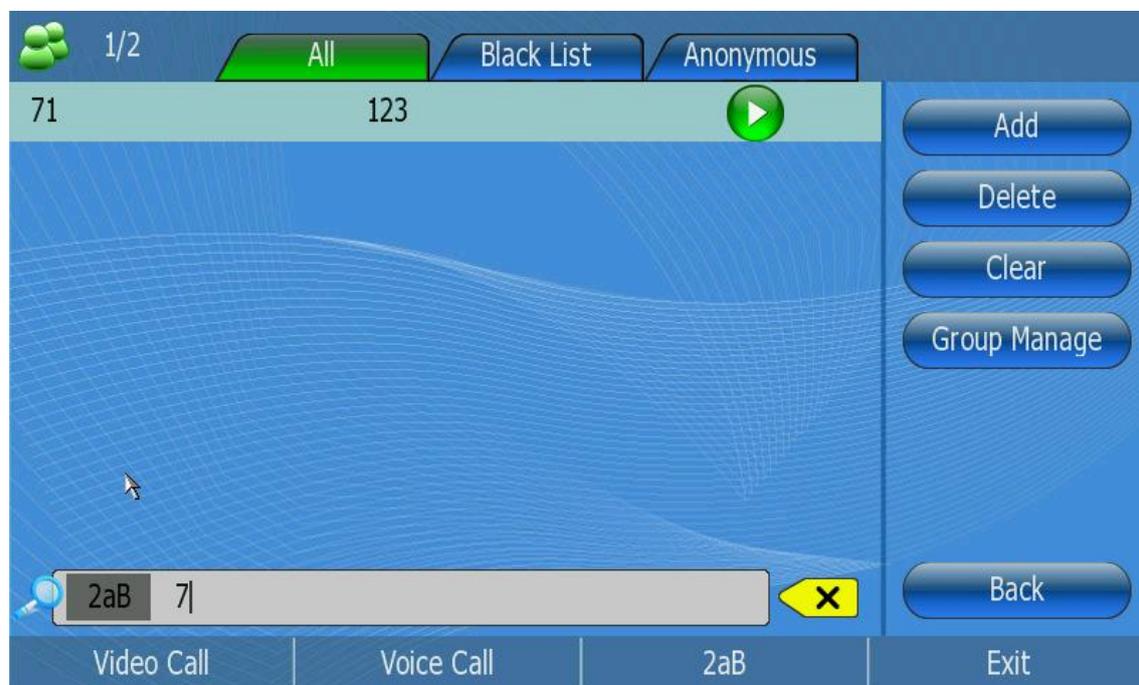

2) Enter the Display Name, SIP Name, Office Number, Mobile Number, Family Number and Group Name, then click the Insert button to add the record.

- 3) Click the Save button to save the changes.

Search Contact

Search a contact via phone interface:

- 1) Click **【Directory】** option to enter the Contacts page.

- 2) Enter the contact name by the keypad, for example "7", then the screen will show all the contacts whose name begins with "7".
- 3) Press <F4> button to get back to Contacts page.

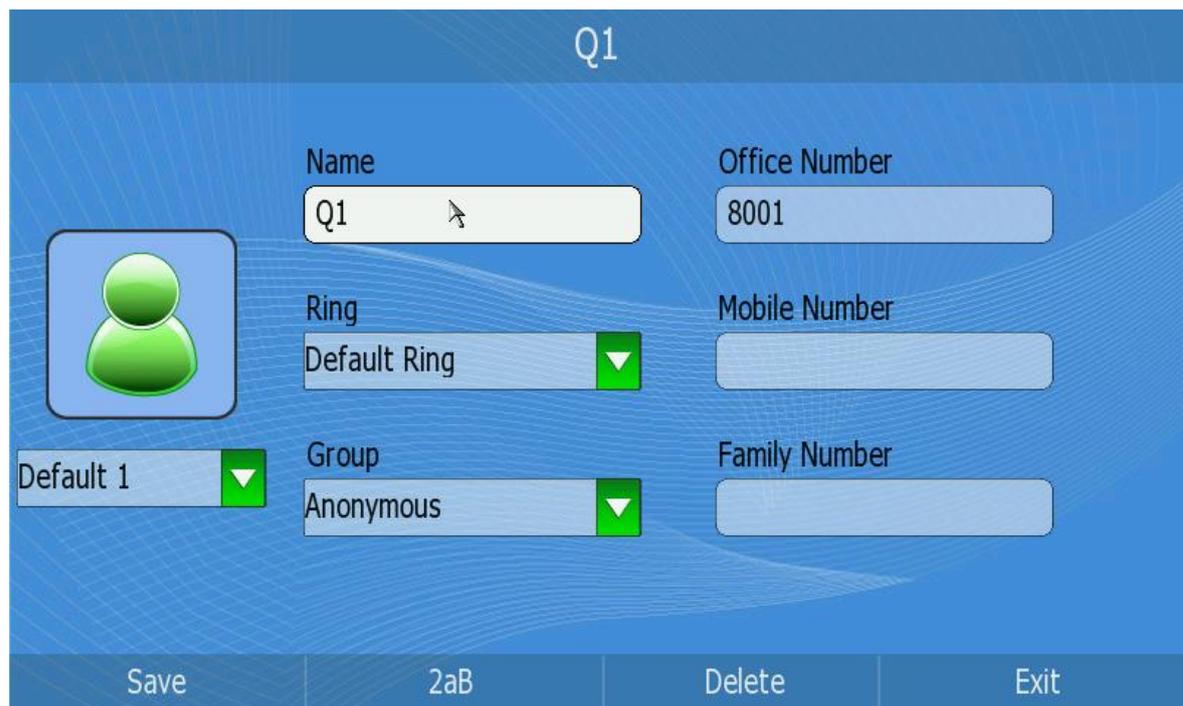

Note:

1. Users can click the **【2aB】** key to switch the input methods. For example, pressing the number button 2 once, you can enter the number 2 and double-click it, it will change to the letter "a". With the clicking time increase, corresponding letters of b, c and A, B, C will be typed, so do the other DTMF keys; Pressing  key, you can delete the input letters or numbers.
2. In the Search page, if you press the function keys, (for example, press the options button), it will turn to the related function pages.

Edit Contact

Edit a contact via phone interface:

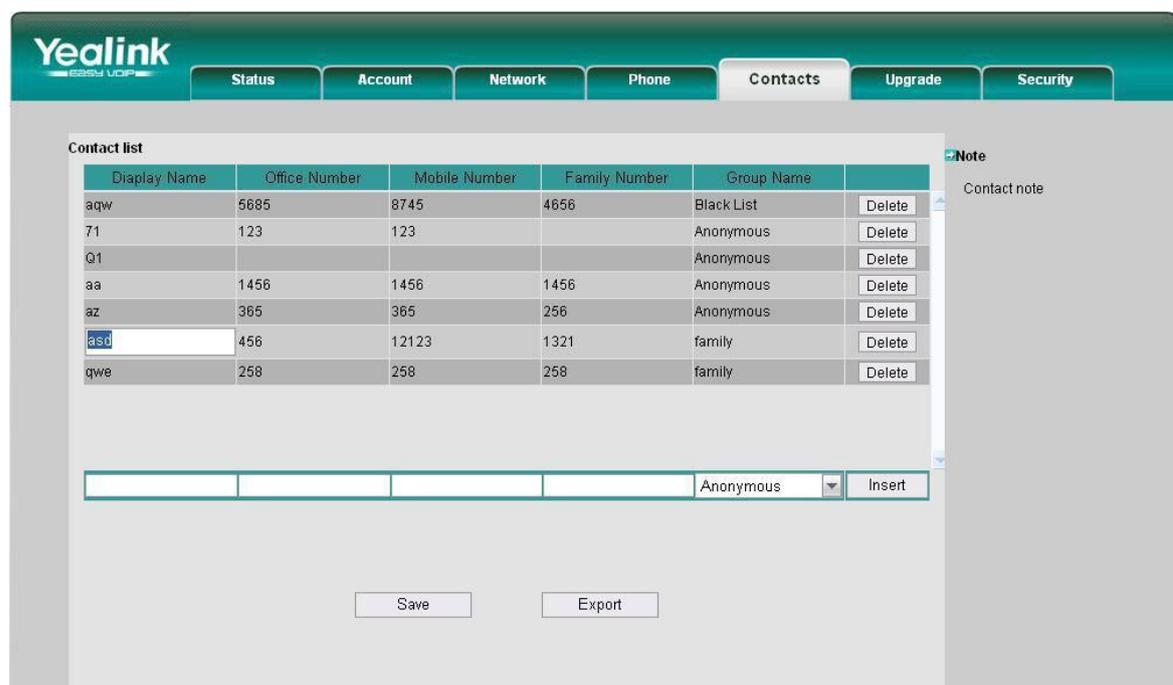

- 1) Click **【Directory】** to enter the configuration page.
- 2) Use the Up/Down navigation keys to choose a record, then press **【OK】** -> <F1> button to enter the edition page.

- 3) Press Up/Down button to choose and fill in different options, in the **【Ring】** and **【Group】** options, press <OK> to pop up the pull-down menu, choose your preferred options, then press <OK> button to confirm.
- 4) After the edition, press the Save soft key to save your changes.

Edit a contact via web interface:

- 1) Click Contacts option to enter the configuration page.
- 2) Choose a record, and then click the option you want to change. For example, if you want to change the display name of contact 789, just the click it and input the right name.

- 3) Click the Save button to save your changes.

Move a contact to the blacklist via phone interface:

- 1) Click **【Directory】** , then use the Up/Down navigation keys to choose a record you want to move to the blacklist and press the <OK> button to enter.
- 2) Press the <F1> button to enter the edition page.

The screenshot displays the contact editing interface for contact '71'. The fields are as follows:

Field	Value
Name	71
Office Number	123
Ring	Default Ring
Mobile Number	123
Group	Anonymous (with pull-down menu open)
Family Number	

The pull-down menu for the Group field is open, showing the following options: Anonymous, Black List, Anonymous, and family. The 'Black List' option is currently selected and highlighted in blue. At the bottom of the screen, there are three buttons: Save, Delete, and Exit.

- 3) Click the Group option to open the pull-down menu and choose Black List option.
- 4) Press the <F1> to save your changes.

Note:

If a contact has been moved to the blacklist, then the call from this contact will not get through.

Move a contact to the blacklist via web interface:

- 1) Click Contacts option to enter the configuration page.
- 2) Choose a record and click the Group Name option, then choose Black List in the pull-down menu.

Display Name	Office Number	Mobile Number	Family Number	Group Name	Delete
aqw	5685	8745	4656	Black List	Delete
71	123	123		Anonymous	Delete
Q1				Anonymous	Delete
aa	1456	1456	1456	Anonymous	Delete
az	365	365	256	Anonymous	Delete
asd	456	12123	1321	family	Delete
qwe	258	258	258	family	Delete

3) Click the Save button to save your changes.

Delete Contact

Delete a contact record via phone interface:

- 1) Click **【Directory】** -> **【Options】** , then use the Up/Down navigation keys to choose a record you want to delete.
- 2) Click **【Delete】** option to pop up the dialog reminding "Delete the contact?".

3) Click  to confirm the operation, or click  to cancel the operation.

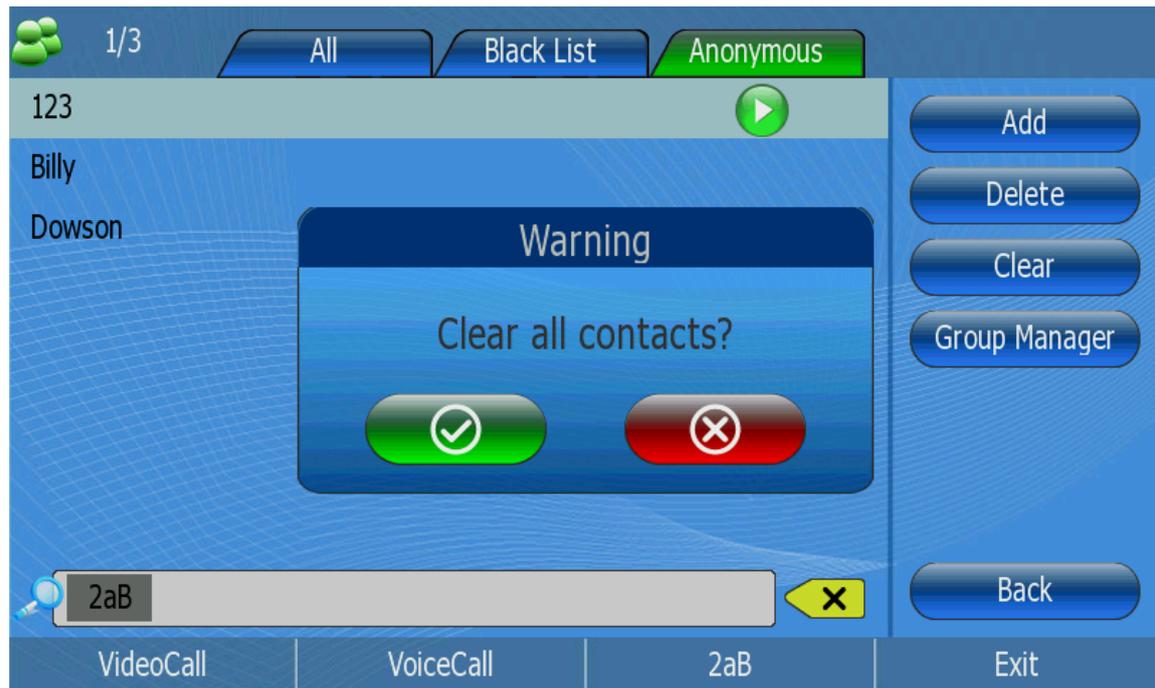

Delete a contact via web interface:

- 1) Click Contacts option to enter the configuration page.
- 2) Choose a contact, then click the Delete button to delete it.
- 3) Click the Save button to save your changes.

Clear Phonebook

Clear the phonebook via phone interface:

- 1) Click **【Directory】** -> **【Options】** -> **【Clear】** option to pop up the dialog reminding "Clear all contacts?".

- 2) Click  to confirm the operation, or click  to cancel the operation.

Note:

When you click  to confirm clear all contacts, the phone default is clear the current group.

Group Manage

Add group

Add groups via phone interface:

- 1) Click **【Directory】** -> **【Options】** -> **【Group Manager】** -> **【New】** option to enter the configuration page.

- 2) Enter the Group Name and choose the Group Ring of the new group. Then click  to confirm the operation, or click  to cancel.

Edit group

Edit a group via phone interface:

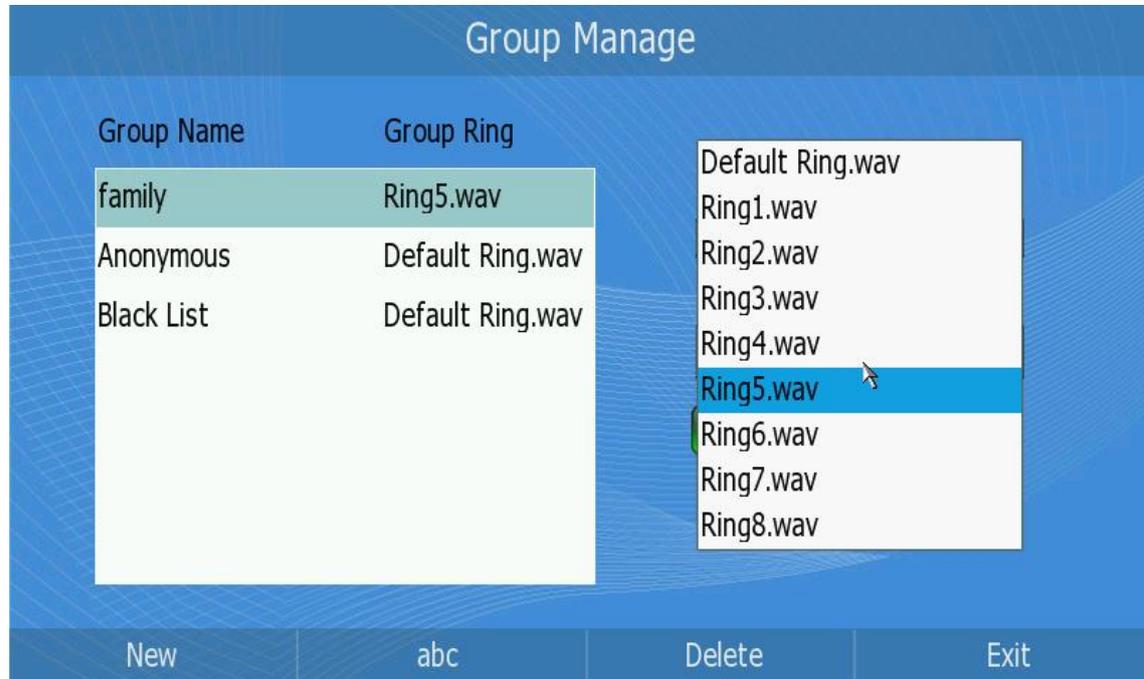

- 1) Click **【Directory】**->**【Options】**->**【Group Manage】** option to enter the configuration page.

- 2) Press the Up/Down navigation keys to choose a group you want to edit in the left side, then the input box on the right will show the corresponding Group Name and

Group ring information.

- 3) Click the input box of Group Name, then press <F3> to delete the original name, then input the new name by keypad.
- 4) Click the Group ring option, then choose your preferred ring tone in the pull-down menu.

- 5) After the edition, click  to confirm the changes, or click  to cancel the operation.

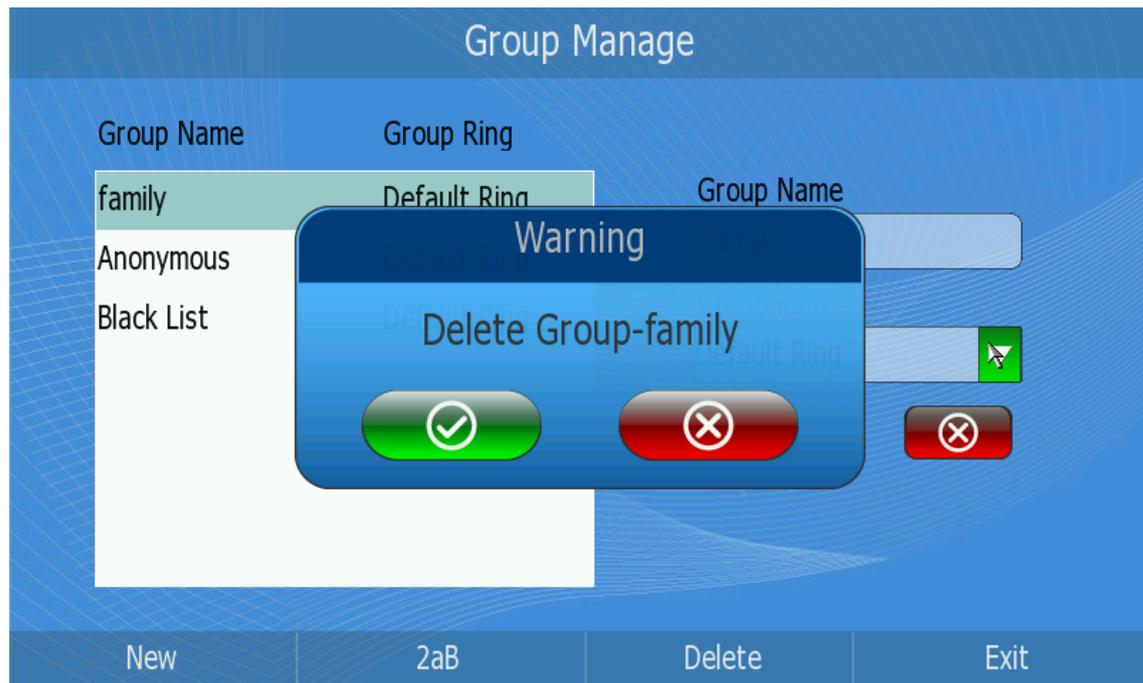

Note:

Can not modify the key groups: the "blacklist" and "Anonymous".

Delete Group

Delete a group via phone interface:

- 1) Click **【Directory】->【Options】->【Group Manager】** option to enter the configuration page.
- 2) Press the Up/Down navigation keys to choose a group you want to delete.

- 3) You will be disconnected from the call, when C pick up, B can talk to C.

Note:

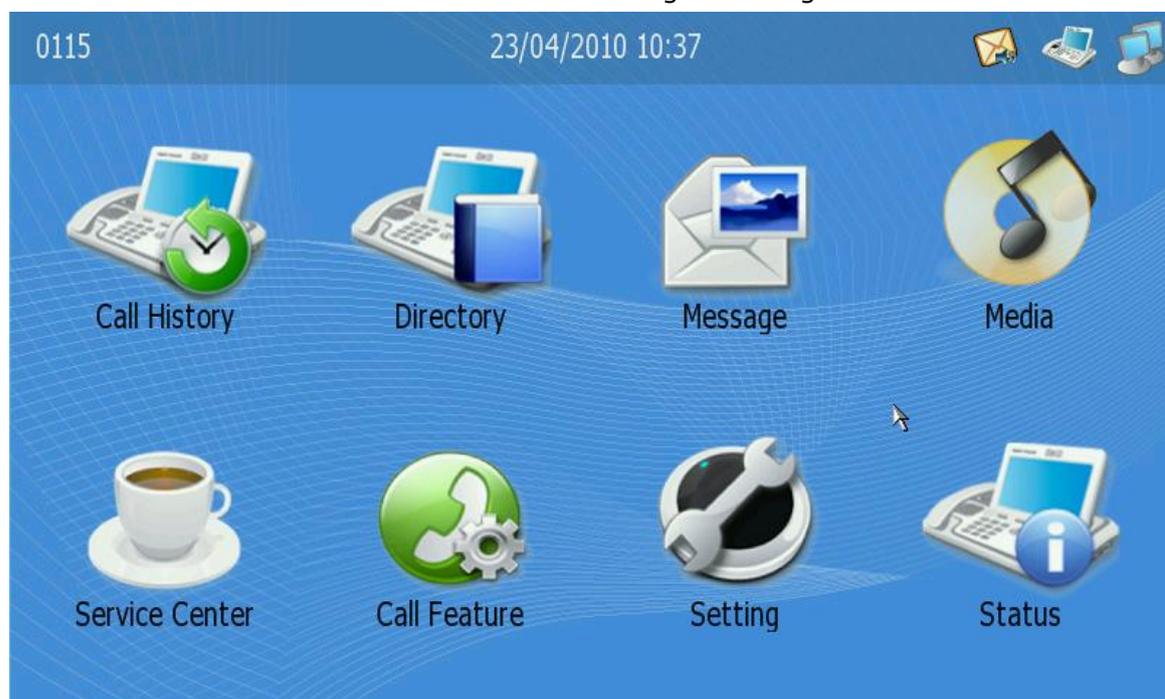

Make sure that the SIP server you have registered supports this function.

Message

Your voice mailbox messages, which are usually stored on a media server of your local or hosted VoIP telephony system, can be accessed from your phone.

New voice messages can be indicated both acoustically and visually as described below:

- The idle screen indicates a new voice messages coming.

Note:

Please contact your system administrator for the connecting code. Different systems have different codes.

To retrieve the new voicemail via phone interface:

- 1) Click the Message icon directly.
- 2) You may be prompted to enter the password which is needed to connect to your VoIP telephony system. It depends on your system.
- 3) Your voice mailbox is called and you are able to listen to your new and old messages.

To configure Voicemail Number via phone interface:

- 1) In desktop status, click Call Feature->Voice Mail to enter; You can also click the Message icon to enter the configuration page directly when the phone is idle.

- 2) Users can check the register status of each account, and the number of received voice mail in this page.
- 3) Choose an account, and enter the voicemail concatenated code then press <F1> to save your changes, or press the icon  behind to connect to the server.

Note:

Before retrieving the new voicemail, please make sure that the connecting code has been set on the phone.

Using the Advanced Phone Functions

Account Settings

Basic Settings

Configure account information via phone interface:

- 1) Click Setting->Account option, choose a account to enter the configuration page.

- 2) Click the icon  on the left to enable this line;
- 3) Choose and fill in different options.
- 4) Press <F1> button to save the changes.

Note:

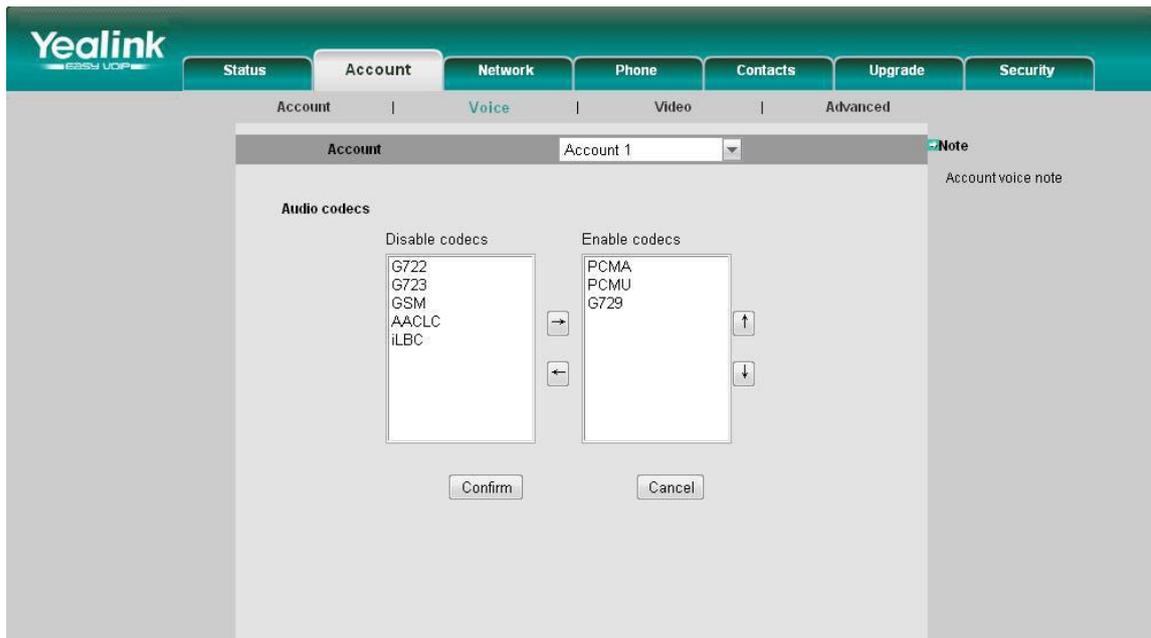

Please contact your ISP for exact information.

Configure account information via web interface:

- 1) Choose Account->Account page to do the relating settings.
- 2) Please reference to "Configuration and Registration" section for more details of the parameters.

Audio codecs

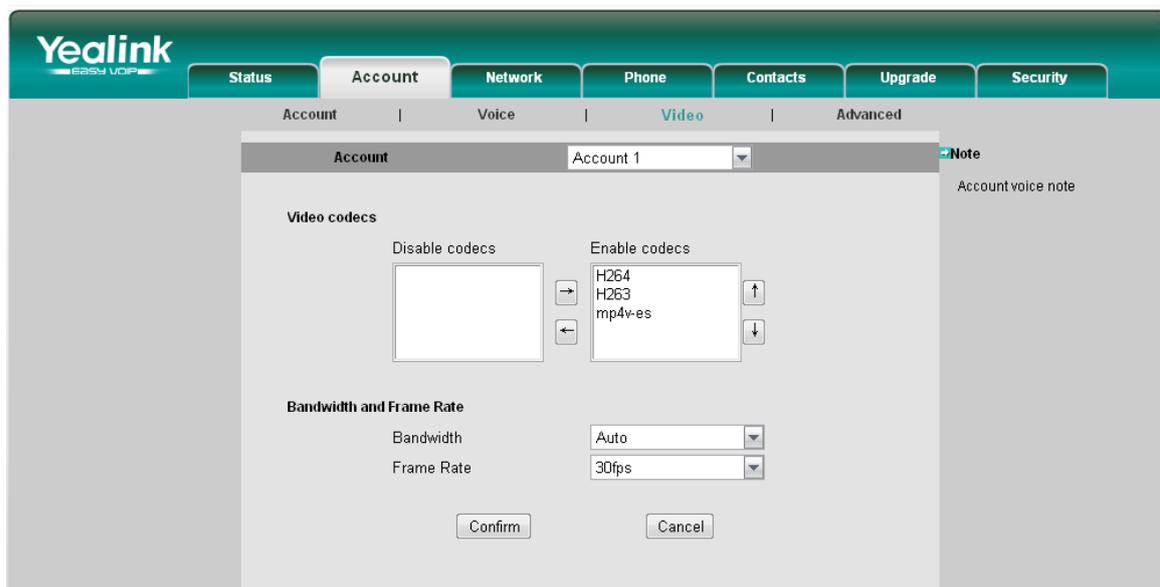

Select Account->Voice to set the audio codecs via web interface:

There are 8 voice codecs, press the Up/Down button to choose the right priority.

Video codecs

Select Account->Video page to set the video codecs via web interface:

Please check the following table for more information about video configuration.

- 1) Video Codecs: there are 3 video codecs, press the Up/Down button to choose the right priority.
- 2) Bandwidth and Frame Rate: To set the Bandwidth and Frame Rate parameters. The default value of Bandwidth is Auto, and the Frame Rate is 30fps.

Advanced Settings

Select Account->Advanced page to set the advanced information via web interface:

The screenshot shows the Yealink web interface with the 'Account' tab selected. The 'Advanced' sub-tab is active, displaying settings for 'Account 1'. The settings are as follows:

Field Name	Value	Unit/Range
UDP Keep-alive Message	Disabled	
UDP Keep-alive Interval	30	(seconds)
RPort	Disabled	
Login Expire	3600	(seconds)
Local SIP Port	5062	
SIP Session Timer T1	0.5	(seconds)
SIP Session Timer T2	4	(seconds)
SIP Session Timer T4	5	(seconds)
DTMF Type	RFC2833	
How to INFO DTMF	Disabled	
DTMF Payload	101	(97~127)
Min RTP Port	11780	(1024~65535)
Max RTP Port	11800	(1024~65535)

Buttons for 'Confirm' and 'Cancel' are visible at the bottom of the settings panel.

The following table lists the instruction of the field about the advanced Account Setting.

Field Name	Description
<i>UDP Keep-alive Message</i>	Defines whether to active the phone UDP Keep-alive mechanism. The default is Enabled.
<i>UDP Keep-alive Interval</i>	This parameter specifies how often the phone will send a packet to the SIP server. Default is 30 seconds.
<i>Login Expire</i>	This parameter specifies the time frequency that phone refreshes its registration. The default interval is 3600 seconds.
<i>Local SIP Port</i>	Local SIP port. The default value is 5060.
<i>RPort</i>	The parameter allows you configuring the proxy to send responses back to a particular address and port. The default is disabled.
<i>SIP Session Timer</i>	This document defines an extension to the Session Initiation Protocol (SIP). This extension allows for a periodic refresh of SIP sessions through a re-INVITE or UPDATE request. The refresh allows both user agents and proxies to determine if the SIP session is still active.
<i>DTMF Type</i>	Select the DTMF type.

You can only configure these settings via web interface.

- 1) Choose Account.

- 2) Choose Advanced to do the relating settings.

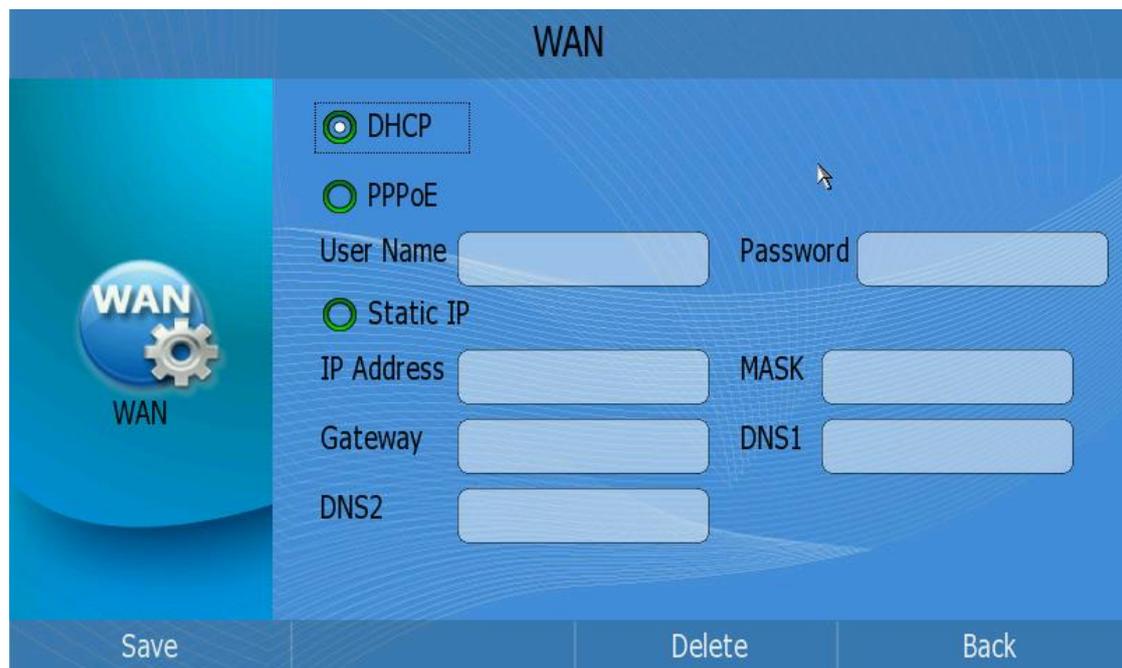

You can consult your system administrator for more information.

Network Setting

WAN

Configure WAN information via phone interface:

- 1) Click Setting-> WAN option to enter configuration page;
- 2) Click the corresponding icon  to active the proper IP assignment type.

WAN

DHCP

PPPoE

User Name Password

Static IP

IP Address MASK

Gateway DNS1

DNS2

Save Delete Back

- 3) If you choose **【DHCP】** type, Press <F1> to save the changes;
- 4) If you choose **【PPPoE】** type, you should also configure the corresponding "User Name" and "Password". Then press <F1> to save the changes.
- 5) If you choose **【Static IP】**, please choose and configure "IP Address", "MASK", "Gateway", "DNS1" and "DNS2", then press <F1> to save the changes.

Configure WAN information via web interface:

- 1) Choose Network.
- 2) Choose Internet Port (WAN) option to do the relating settings.

BandWidth

Configure Bandwidth and Frame Rate via web interface:

- 1) Choose Account->Video.
- 2) Choose Bandwidth and Frame Rate option to do the relating settings.

Maintenance Tasks

Administrator Mode

The phone allows two modes to configure the phone:

- User Mode
- Administrator Mode

Administrator mode grants unlimited access to the phone configuration on both web and phone interface. User Mode can not set the parameters such as: Accounts, Network, Factory , Reboot and some other phone settings by the Phone interface.

Administrator/User Password

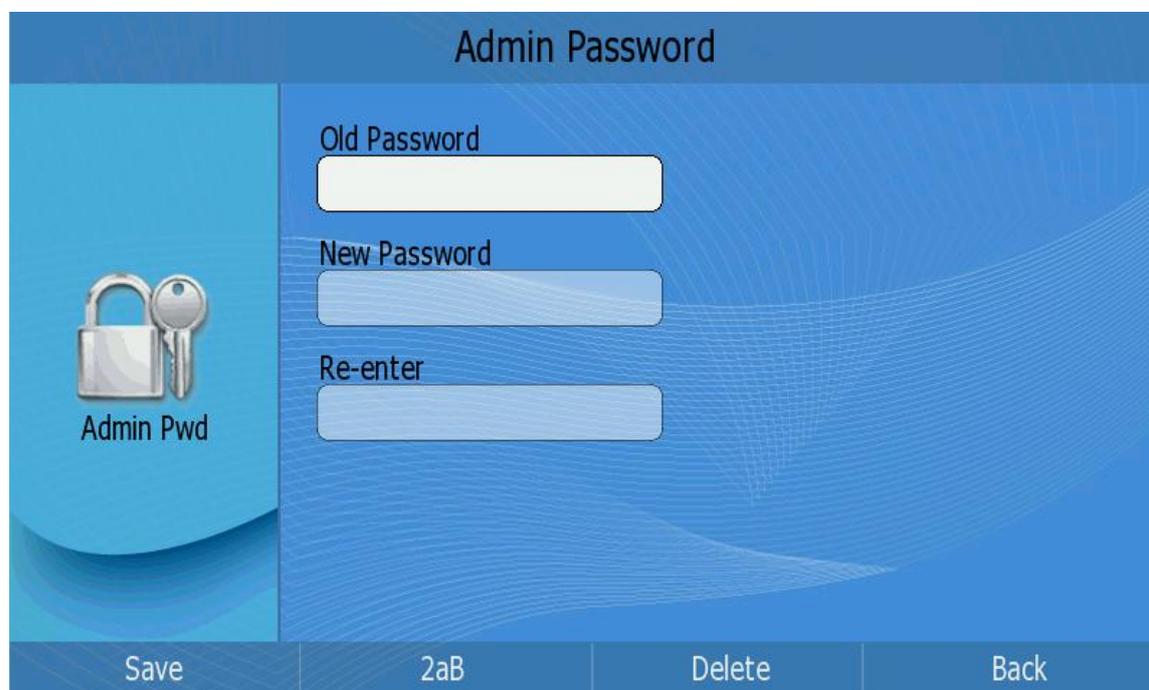

Administrator mode grants unlimited access to the phone configuration on both web and phone user interface. The administrator/user password is used to access:

- Web interface along with user name.
- The advance settings such as Network, Account, reboot, Factory Settings via phone interface.

The default administrator password is **admin**. Meanwhile the user name for web interface access is **admin**.

To change the administrator password via phone interface:

- 1) Click Setting->Security option to enter.

The screenshot shows the 'Admin Password' configuration screen. It features a blue background with a grid pattern. On the left side, there is a vertical panel with a padlock icon and the text 'Admin Pwd'. The main area contains three input fields labeled 'Old Password', 'New Password', and 'Re-enter'. At the bottom, there are four buttons: 'Save', '2aB', 'Delete', and 'Back'.

- 2) Choose and fill in the **【Old Password】** , **【New Password】** and **【Re-enter】** input frame.

- 3) Press <F1> to save the change, or press <F4> to cancel the operation and return

to the "Setting" page.

To change the administrator password via web interface:

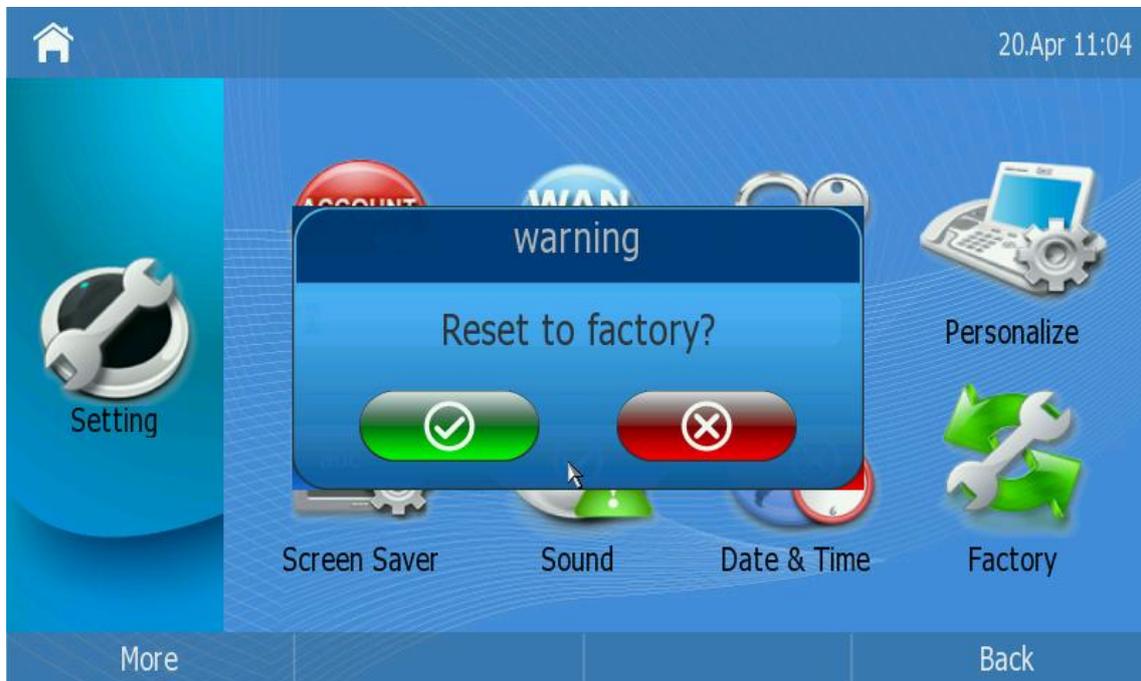

Enter Security page, choose user type in the pull-down menu of User Type option, enter the old password, new password and confirm password, then click Confirm button to save the changes, or Cancel button to cancel the operation.

Factory

You should reset the phone only in this case: the phone configuration was changed and the phone is not functioning anymore. To maintain the configuration of the phone, you need your system administrator or service provider's advice.

Reset to factory via phone interface:

- 1) Click Setting->Factory option to enter the configuration page.

- 2) It will pop up a warning frame asking whether confirm to reset to factory settings.

Click  to confirm the changes, or  to cancel the operation.

To reset to factory via web interface:

- 1) Choose Upgrade page.
- 2) Click Reset to Factory button.

Note:

If you confirm all current setting changes including contact list, call history, account settings, etc will be lost, you need to export the configuration first if you still want to import the old configurations after reset. Or your phone must be configured a new manually unless mass provisioning is used!

Firmware Update

The phone is delivered with pre-installed firmware which allows operating your phone flawlessly. If you require updating the phone's firmware please contact your system administrator.

To update the firmware manually via web interface:

- 1) Choose Upgrade->Basic->Browse, select the firmware file in your local computer.
- 2) Click Upgrade button to update the new firmware.
- 3) Please do not power off during the updating.

Note:

1. Any power interruption during the following process will most likely lead to a flash memory error. As a result the system cannot boot up anymore. The procedure can only be conducted in Administrator Mode.
2. If the updating is failed, you can re-plug the power adaptor, and press the <F2> key for a few seconds, then it will show the Firmware Update, Please Wait...

Auto provision

To setting auto provision via Web interface:

- 1) Choose Upgrade->Advanced, configure the relating settings, It supports three upgrade methods: PNP、DHCP、URL . PNP include PNP Active ; DHCP include DHCP Active and Custom Option ; URL include Server URL、Common AES Key、MAC-Oriented AES Key .

The screenshot shows the Yealink web interface with the 'Upgrade' tab selected and the 'Advanced' sub-tab active. The 'Autoprovision' section is expanded, showing various settings:

- PNP Active:** On Off
- DHCP Active:** On Off
- Custom Option(128~254):**
- Server URL:**
- Common AES Key:**
- MAC-Oriented AES Key:**
- Power On:** On Off
- Repeatly:** On Off
- Interval(Minutes):**
- Weekly:** On Off
- Time:** : -- :
- Day of week:**
 - Sunday
 - Monday
 - Tuesday
 - Wednesday
 - Thursday
 - Friday
 - Saturday
- System Log:**
 - Type:** Disabled Local Server
 - Server Name:**
 -

On the right side, there is a 'Note' section with the text 'Upgrade note'.

- 2) If you choose Power On is On, it will update when the phone is on . And also you can choose the fixed time to update , for example : Interval , Weekly , Time , Day of week , ect
- 3) Click Confirm button, when configuration files are not automatically updated at the same time.
- 4) You can also update immediately by pressing Autoprovision Now button.

The parameters of the Auto-provision:

Parameter	Description
<i>Update Protocol</i>	The phone can be updated via TFTP, FTP ,HTTP or HTTPS.
<i>TFTP Server</i>	If you choose TFTP as protocol TFTP, you need to enter the TFTP server IP address and port.
<i>Check new config</i>	You can specific the period that your phone checks the new firmware from the server: Power on, Repeatedly, Weekly, Power on + Repeatedly, Power on + Weekly and Disabled.
<i>Scheduling</i>	You can specific the period in days which the phone checks and updates the new firmware, the range is 1-30 days.

Note:

1. Any power interruption during the following process will most likely lead to a flash memory error. As a result the system cannot boot up anymore. The procedure can only be conducted in Administrator Mode.
2. If you choose DHCP method , make sure your phone is also chosen DHCP.
3. If you choose the DHCP and URL On , it will choose DHCP at first .

Reboot

To reboot your device via phone interface:

- 1) Click Setting->Reboot option to enter configuration page.

- 2) It will pop up a warning frame asking you whether to reboot your device. Click  to confirm the changes, or  to cancel the operation.

System Log Export

If there are any errors happened in your phone, you can export the system log and send to your system administrator for diagnosis.

To Export the old configuration file via web interface:

- 1) Choose Upgrade, click Export syslog button to export the file to your local computer.
- 2) It will take a few minutes to reset, please do not power off during resetting, or it will cause flash memory error.

Trouble Shooting

Network Link Status shown as unavailable?

- 1) If the internet cable doesn't plug into the Internet port. Please connect the cable first.
- 2) If the WAN port's type is DHCP, the server has been shut down, or there is no available IP address. You can contact with the network administrator for a solution.
- 3) If the WAN port's type is PPPoE, the user name and password may be wrong. Please contact with the ISP.

I can not register to the server?

- 1) Check the IP address. If you set your WAN port in DHCP mode, please make sure that your DHCP server is on.
- 2) Check your gateway.
- 3) Check your DNS server.
- 4) Make sure your account information is the same as you have got from your ISP.
- 5) Check whether the SIP server is on.
- 6) Check the SIP register port, the default value is 5060.

I can't get the IP address?

- 1) Make sure you have plugged the Ethernet cable into the WAN port.
- 2) Make sure that the DHCP server is on, and there are available IP addresses in the server.
- 3) Try to set your WAN port to static IP client mode.

Can not make a phone call?

Confirm the user name and password of the account provided by ISP are right.

No ring tone when there is an incoming call?

The volume is turned off or to the lowest. Please turn up the volume.

The volume is very low during the conversation?

The volume is too low, try to turn up the volume.

When the AV out mode is TV, there is no video?

- 1) The voltage is not stable. Please replace with a stable power adapter.
- 2) Loose of Power plug. Try to re-plug the power.
- 3) Wrong port. Connect to the right port.

During a call, I can not hear any voice?

- 1) Make sure your handset is tightly connected with the phone.
- 2) Check whether you have muted the conversation or not.
- 3) Consult the outbound server details with your ISP.

Have DTMF problem?

- 1) Check which kind of DTMF you are using, and whether it is compatible with the server.
- 2) Consult the payload value with your ISP.

How to change the time?

Select the time zone or enter the time information manually on the webpage or the phone.

How to answer the incoming calls during a call?

If a call comes in when you are in a conversation, press the Answer key to answer the incoming call.

How to refuse incoming calls during a call?

You can turn off the function of call waiting, and then our phone will refuse all the incoming calls when you are in a conversation.

Blank screen?

The device is in Sleep status. Please press any keys to active the screen.

How to update the firmware?

- 1) Enter the webpage of your phone, go to Upgrade, then you can find the option "Select and Upgrade Firmware" at the bottom of the page.
- 2) Select the file to update, and then click the Upgrade button.

Note:

Make sure the firmware you choose is provided by your service provider, or the device will probably crash after the update.

The manual is only for reference, please take the object as the standard.

We reserve the right to improve or change the product and the user guide without notice.

You can download the latest user manuals from our website:
