1、 Overview of A48(W)

A48(W)

A48(W)with Rainbow ET

1.1、Interface

Power Input	DC 5V-2000mA or PoE
LANPort	RJ45
PC Port	RJ45
EXPAN Port	RJ45
Headset Jack	RJ9
Handset Jack	RJ9

1.2、Hardware

LCD	480x272 4.3" TFT
FLASH	1Gbit
RAM	1Gbit
CPU	500MHz Dual-Core
LED Indicator	1 Status Light , 6 line indicators, 8 BLF indicators, 1 voicemail indicator, 1 headset indicator, 1 mute indicator
Rainbow ET Expansion Module	44 programmable keys on each Rainbow ET.

1.3、Software

- Sip 2.0 (RFC3261) and other related SIP RFCs
- 6 SIP lines registration
- STUN
- Jitter Buffer, VAD,CNG
- G711A/u, G722, G726-16, G726-24, G726-32, G726-40, G729, Lin16-16, iLBC
- Echo Cancellation
- SIP Domain name, Authentication and Backup SIP Server
- DTMF (Inband, RFC2833, SIP INFO)
- Call transfer, Call forward, 3-way conference, Call hold, Call back
- DND(Do Not Disturb), Auto answer, Blacklists, Block Call-ID, Block Anonymous call, Dial

plan, IP call

- Phone book with 200 records, 200 answered calls, 200 missed calls, 200 dialed calls
- Auto update via HTTP, HTTPS,FTP, TFTP, PNP
- Syslog
- SNTP,NTP
- Customized Ringtone
- Daylight Saving time
- VLAN, VPN
- WEB access with different login level
- Multi-language:English, Chinese, Farsi, French, German, Hebrew, Italian, Portuguese, Russian, Spanish, Turkish

1.4、 Network

- LAN/PC: Support Bridge mode
- Support VLAN
- Support L2TP VPN
- Support DHCP、STATIC、PPPoE
- Primary/SecondaryDNS Server
- Support QoS
- Web access via HTTP&HTTPS

1.5、 Management and Maintenance

- Support safe mode and firmware updating under safe mode
- Support different level user management
- Configuration via web , keyboard
- Support multi-language
- Firmware and configuration file auto provision
- Support system log

1.6、 Protocol

- IEEE 802.3 /802.3 u 10 Base T / 100Base TX
- PPPoE: PPP over Ethernet
- DHCP: Dynamic Host Configuration Protocol
- SIP RFC3261, RFC3262, RFC3263, RFC3264, RFC3265, RFC2543, RFC3489, RFC3842,

RFC3515, RFC2976, RFC3428, RFC2327, RFC2782, RFC1889

- TCP/IP: Transfer Control Protocol/Internet Protocol
- RTP: Real-time Transport Protocol
- RTCP:RTP Control Protocol
- DNS: Domain Name Server
- TFTP: Trivial File Transfer Protocol
- HTTP:Hypertext Transfer Protocol
- FTP:File Transfer Protocol

1.7、Compliant and Certified Standard

- CE: AGC01180140201E2, AGC01180140202E2
- Comply with ROHS in EU
- Comply with ROHS in China

- Operation temperature: lower than 60° C
- Storage temperature: lower than 60° C
- Humidity: 10 to 90% no dew

1.8、Packing list

Model	A48(W)
Telephone	1Unit
Handset	1 Unit
Handset cable	1 Unit
Stand bracket	1Unit
Power adapter	Optional
Network Cable	1 unit, 1.5 meters
CD (User mnuaal)	1 Unit
Rainbow ET	Optional
Headset	Optional

1.9、 Installation

A48(W) is able to be connected with network via LAN port. Under the Bridge mode, other devices (Laptop, IP phone) is able to access network via the PC port of Rainbow 4(S).

1、 Stand bracket installation instruction

A. Put the bottom side of the IP phone upside and press one-side joints of stand bracket into the slot, please refer the picture as below:

B. Press the other side joints into the slot according to the direction of the arrow:

C. It is the right picture after fixing the stand bracket below:

D. Disassemble the stand bracket:

Push the spring joint of stand and pull the stand according to the direction of the arrow. When the joints are pulled out of the slot, you can take off the stand bracket

2. Wiring instruction

Plug in the power adapter, cable and handset or headset to the corresponding ports as below picture and press them to the slots on the stand bracket.

2、 Call Function

2.1、 Answer the calls

When there is an incoming call, phone will remind user with ringing. There are 3 ways to answer the call:

A. Answer by handset

Pick up the handset and talk with the caller. If you want to hang up, just put back the handset. When you are talking with the handset and want to switch to speaker or headset mode, please press  key or  key, and then put down the handset.

B. Answer by speaker

Press  key and talk with callers by built-in Micro-phone and Speaker. If you want to hang up, please press  key again. Switch calling or talking into handset mode by lifting the handset under speaker mode. Press  key will switch calling or talking into headset mode.

C. Answer by headset

Keep your microphone connected with the RJ9 headset jack, when there is an incoming call, press  and talk with the caller. If you want to hang up, please press  again. Pressing  can change calling or talking into speaker mode, and lifting the handset switches to handset mode.

2.2 、 Make Calls

A. Use the handset

Pickup the handset, the LCD will show the current lines (user is able to switch from line1 to line6 by pressing the line key beside the LCD). Press soft key "**Send**" to dial the number. When you hear the tones of "du~~du~~" and the phone number your dialed is being displayed on the LCD, the phone at the side of being called should be ringing. If the called party answers this calling, the call is established and the calling timer is started immediately.

B. Use the speaker

Press  key, the LCD will show the current lines (user is able to switch from line1 to line6 by pressing the line key beside the LCD). Input the phone number and press soft key "**Send**" to dial the number. When caller hear the tones of "du~~du~~" and the phone number your dialed is being displayed on the LCD, the phone at the side of being called should be ringing. If the called party answers this calling, the call is established and the calling timer is started immediately.

C. Use the headset

Press  Key, the LCD will show the current lines (user is able to switch from line1 to line6 by pressing the line key beside the LCD). Input the phone number and press soft key "**Send**" to dial the number. When caller hear the tones of "du~~du~~" and the phone number your dialed is being displayed on the LCD, the phone at the side of being called should be ringing. If the called party answers this calling, the call is established and the calling timer is started immediately.

D. Dial from phone book

1. Press  key to enter the menu and choose "**Directory**" option. Press "**Enter**" soft key and then find the contact person by navigation keys. When the certain contact person is highlighted, press "**Dial**" or just pick up the handset to call this number.
2. Pick up the handset, press "**Directory**" soft key, then find the contact person and press "**Dial**" soft key.

3. Pick up the handset, press  and enter "**Directory**", then find the contact person and press "**Dial**" soft key.

E. Dial from call history

1. Press  key to enter the menu and choose "**History**" option, then select one of call history entry, and press "**Dial**" soft key or pickup the handset to call this number.

2. Pickup the handset, press "**History**" soft key, then select one of call history entry, and press "**Dial**" soft key to call this number.

3. Pickup the handset, press  and enter "**Call History**", then select one of call history entry, and press "**Dial**" soft key to call this number.

2.3、 Pre-dial

It's a method to dial a phone number immediacy at standby mode.

The method is as below:

A. Dial-up the phone number at standby mode

B. Press soft key "**Dial**" or Pick up the handset or Press  or  to send out the number.

2.4、 Multiple line dial-up

A48(W) supports 6 SIP lines. That means user can register 6 different sip accounts simultaneity. User is able to choose line1, line2, line 3 , line 4, line 5 or line 6 by pressing corresponding line key. Line1 or the 1st Line registered successfully under idle is the priority to pick up the calls.

A48(W) maximum supports 24 concurrent calls, that means 24 calls can be setup on each of single line, but the total number of concurrent calls on all lines can not more than 24. When there is an incoming call to another line, LCD will show the incoming phone number and line

LED will be blinking in green. User is able to press the corresponding line key or press soft key **"Hold"** the current line on which you're talking then press **"Answer"** to receive the incoming call from another line.

Pick up a new incoming call while on calling: When a new incoming call happened on the being

occupied line, press the key  or  to check details of the new incoming call, and press the soft key **"Answer"** on GUI to pick up the new call. The current calling will be hold after the new call picked up. When a new incoming call happened on another idle line, the source phone number of new incoming call will be displayed on the Screen and the LED of corresponding line key will be fast blinking (Green), Press the corresponding line key to pick up the new call, Or Press the soft key **"Hold"** to hold the current call and then press **"Answer"** key to pick up the new call.

Make a new call while on calling: To make a new call on a being occupied line, Press the key **"Hold"**, then input the destination phone number and press the key **"Dial"**, or Press the soft key "New", then input the destination phone number and press the key **"Dial"**. To make a new call on an idle line, press the corresponding line key, input the destination phone number and press the key **"Dial"**.

2.5、 Call Hold

The current calling will be hold by pressing soft key **"Hold"** or , and the held call will be resumed after pressing soft key **"Resume"** or  or the corresponding line key. Even on 3-way conference calling, the conference will be held after pressing **"Hold"** key, and be resumed to 3-way conference after pressing **"Hold"** Key again. Remember the conversation is still on hold without being ended even if hung up under the status of hold.

2.6、 Call Transfer

1. Attended call transfer

The attended transfer allows user to call a third-party before transferring the calling.

While calling, press the **"Transfer"** soft key to hold the current call and dial the target number you want to transfer to on the activated line and press **"Send"** soft key to call that number. After the target party answers the call, press **"Transfer"** soft key again to complete the transfer.

If the target number has been setup in the current BLF list, and you have already finished the necessary setup on Webpage of A48(W), there is an easier way to complete the attend transfer. While calling, press the corresponding BLF key of the target number and then press the **"Transfer"** soft key, the attend transfer will be achieved.

Setup BLF list with attend transfer functions on Webpage:

"Phone"→"Features"→"Transfer Settings"→"Transfer Mode via DSS Key (Attend Transfer)"

2. Blind call transfer

The blind transfer allows user to transfer a call without speaking to the third party. On the user side, the call will be ended as soon as the target phone number is dialed.

Operating steps: Press **"More"** soft key to get more option, then press **"Bxfer"** soft key, input the transfer target number and press **"Send"** soft key.

If the target number has been setup in the current BLF list, and you have already finished the necessary setup on Webpage of A48(W), there is an easier way to complete the Blind transfer. While calling, press the corresponding BLF key of the target number, the blind transfer will be achieved.

Setup BLF list with blind transfer functions on Webpage:

"Phone"→"Features"→"Transfer Settings"→"Transfer Mode via DSS Key (Blind Transfer)"

2.7、Mute calls

The input audio will be not transmitted to peer phone after pressing  key, and the phone will be muted even switched among different modes of speaker, handset and headset.

To un-mute, just press  key again.

2.8、3-Way Conference

1. While on calling, press the soft key "**Conf**", input the 3rd party's phone number and then press the softkey "**Dial**" or press the soft key "**Conf**" and press the corresponding BLF key to invite the 3rd party to join a conference call.
2. After the third party answers the call, pressing "**Conf**" key again to establish the 3-way conference
3. The initiator of 3-way conference can press the soft key "**Hold**" to hold the conversation with other two parties, and press "**Resume**" to back to 3-way conference.
4. If the initiator hangs up the call or press the soft key "**End Conf**", the conference will be ended and the calling between the other two parties will be hung up as well.
5. The initiator of 3-way conference can press the soft key "**Split**" to separate the conference call, and the calling between initiator and the other two parties are still active but under the status of Call hold.
6. After split the 3-way conference, press the soft key "**More**" and then press the softkey "**Join**" to resume the 3-way conference or press the softkey "**Conf**" to setup a new 3-way conference call.

2.9、Hang up the phone

1. Softkey hang up

While on calling, press the softkey "**End Call**" to hang up.

2. Handset hang up

Put back the handset at handset mode, the current calling will be hung up.

3. Speaker hang up

Press  key at speaker model, the current calling will be hung up.

4. Headset Hang up

Press  key at headset model, the current calling will be hung up.

5. Hang up one line call

Press the hook to hang up the current calling when 2 calls happened simultaneously.

2.10、 Voicemail

A48(W) has a  key for entering voicemail box and indicating new voicemail. Press

 key to enter the menu to configure voicemail number if you have never configured it previously. Otherwise, the voicemail number will be called after pressing it.

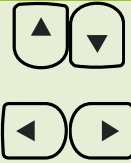

3、 Keypad and GUI

User Name	Account ID
Password	Password for account
SIP Server	The address that accounts needed to register from
Outbound Status	The status of Outbound Server, "off" by default
Outbound Proxy	IP address of Outbound Agency
Stun Status	The status of Stun Server, "off" by default
Stun Server	IP address of Stun Server

Configure account via web: **Account**→**Basic**

The screenshot displays the ATCOM web interface for configuring an account. The top navigation bar includes 'Basic', 'Account', 'Network', 'DSS Key', 'Phone', and 'Contacts'. The 'Account' section is selected, and the 'Basic' tab is active. The configuration fields are as follows:

Field	Value	Port	Info
Account	Account 1		
Register Status	Register failed		
Account Active	Enable		
Label			?
Display Name			?
Register Name			?
* User Name			?
Password			?
* SIP Server		5060	?
Enable Outbound Proxy Server	Disable		?
Outbound Proxy Server		5060	?
Transport	UDP		?
NAT Traversal	Disable		?
STUN Server		3478	?

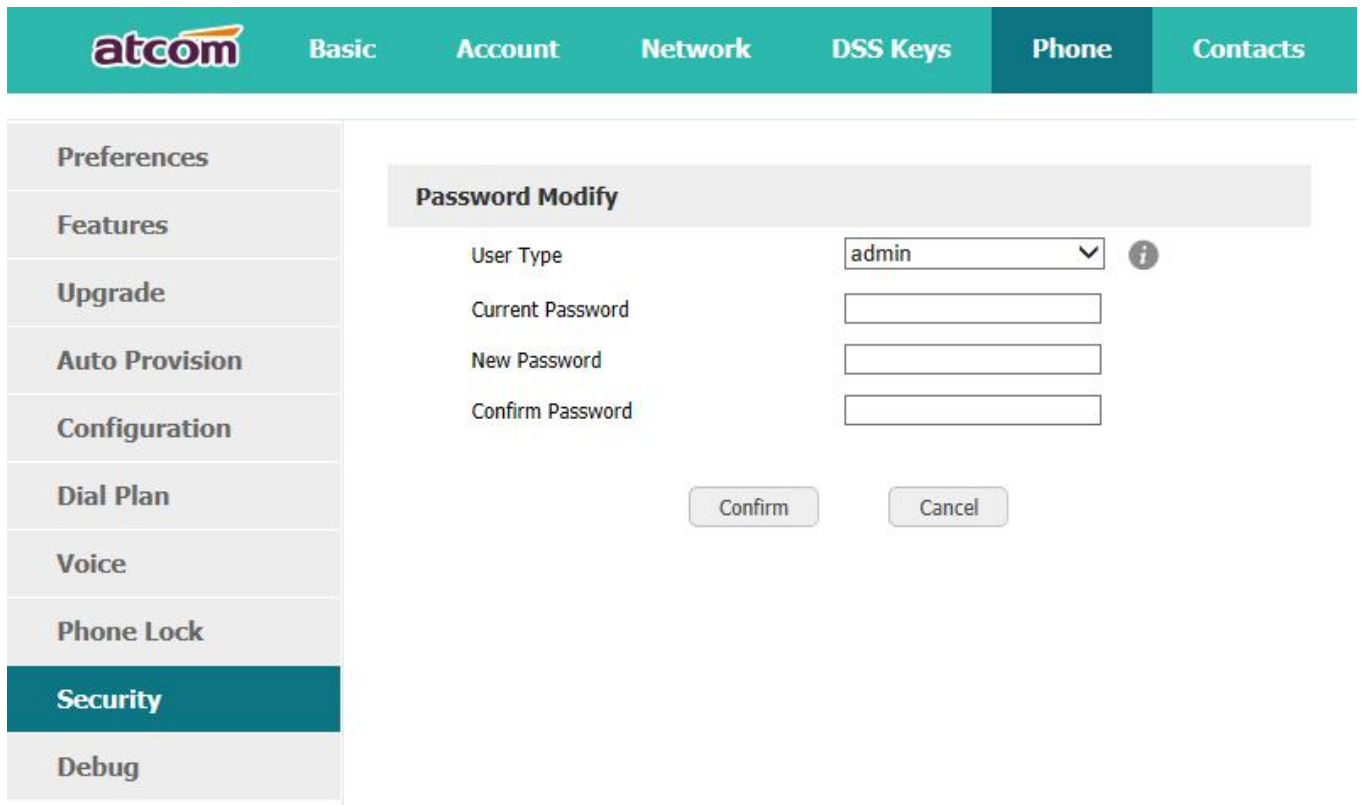

2. Set Password

The password for Advanced Settings also is used for Web access as the role "admin". Path to set password on phone: Press  → **Settings** → **Advanced Settings** → **Input password** → **Set Password**.

Item	Description
Current PWD	The current password for web access as the role of "admin", it's "admin" by default.
New PWD	To set the new password, blank is acceptable.
Confirm PWD	Input the new password again, to confirm the new password.

Set password via Web: **Phone** → **Security**.

The screenshot shows the atcom web interface with a teal header containing the logo and navigation tabs: Basic, Account, Network, DSS Keys, Phone, and Contacts. On the left is a vertical sidebar menu with options: Preferences, Features, Upgrade, Auto Provision, Configuration, Dial Plan, Voice, Phone Lock, Security (highlighted in teal), and Debug. The main content area displays the 'Password Modify' form with the following fields: 'User Type' (a dropdown menu set to 'admin' with an information icon), 'Current Password', 'New Password', and 'Confirm Password' (all text input fields). At the bottom of the form are 'Confirm' and 'Cancel' buttons.

3. Network

Path to set network parameters on phone: **Press**  **→ Settings → Advanced Settings → Input the password → Network.**

➤ LAN Port

Connect the phone with local network via LAN port, to gain IP address in 3 ways: DHCP, Static, PPPoE. Set the LAN port via Web: **Network**→ **Basic**.

DHCP

The phone gains IP address via DHCP by default.

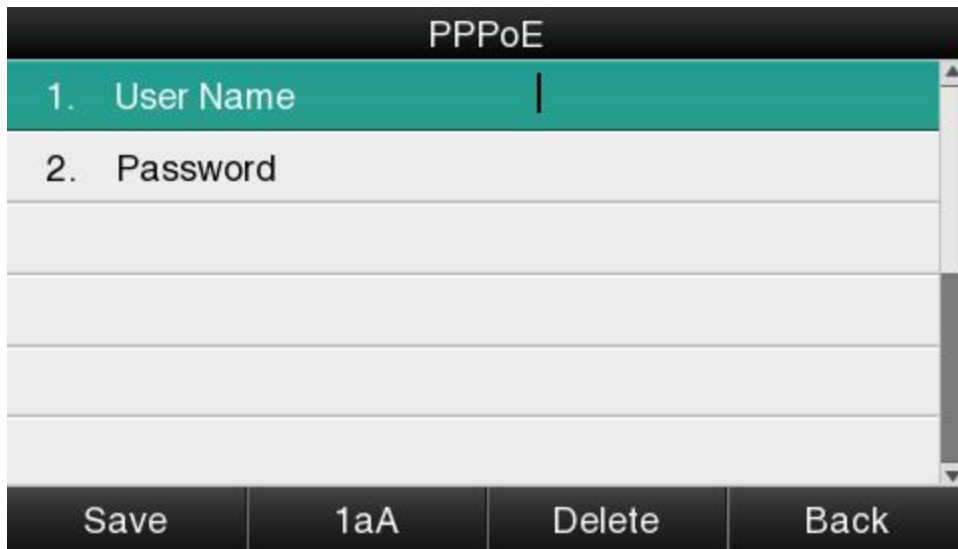

STATIC IP

If the phone gains IP address via Static IP, user must input the IP address info manually.

PPPoE

If the phone gains IP address via PPPoE, user must input username/password of PPPoE, and PPPoE server or ISP support will be requested in this way.

PPPoE

1. User Name |

2. Password

Save 1aA Delete Back

➤ **PC Port**

Only bridge mode support by PC port.

1. Keypad Lock Enable: select "Yes" or "No" to enable or disable keypad lock
2. Keypad Lock Type: Menu key/Function keys/All keys/Answer call only.Defaults to Menu key.
3. Phone Unlock PIN(0~15 Digit):set the phone unlock PIN.Range: 0~15 digit.
4. Phone Lock Time Out(0~3600s): set the phone lock time out.Range: 0~3600s
5. Emergency:set emergency number.Defaults to 110、120、119 and 911.

5. Reboot

After the restart,the phone will back to standby interface.

6. Reset to factory

Once reset to factory, all parameter settings will back to the factory default value, and all configuration will be cleared, users must be careful on this.

Reset Option: **Full Reset**, **Config Reset** and **UserData Reset**.

Reset to factory via Web: **Phone**→**Upgrade**→**Reset to Factory**.

3.4.7、Display

For more convenient, users are able to adjust the contrast grade and backlight of the main LCD display and the BLF LCD display.

1、Wallpaper

There are 5 different wallpapers for options, press the soft key "**Switch**" or the key 、 for modification.

2、Slave Contrast

There are 9 different contrast grades for options, press the soft key "**Switch**" or the key ,  for modification, 6 is the default value.

3、 Slave LCD Mode

There are 2 different modes for options, press the soft key **"Switch"** or the key  ,  for modification, defaults to Mode2.

4、 Backlight

Backlight is the brightness of LCD, also it has been defined as 9 different grades. The number "9" means the lightest.

To adjust the brightness of LCD expansion module, it must be connected with the hosted phone. Otherwise the host phone will indicated "No expansion module".

5. Screensaver

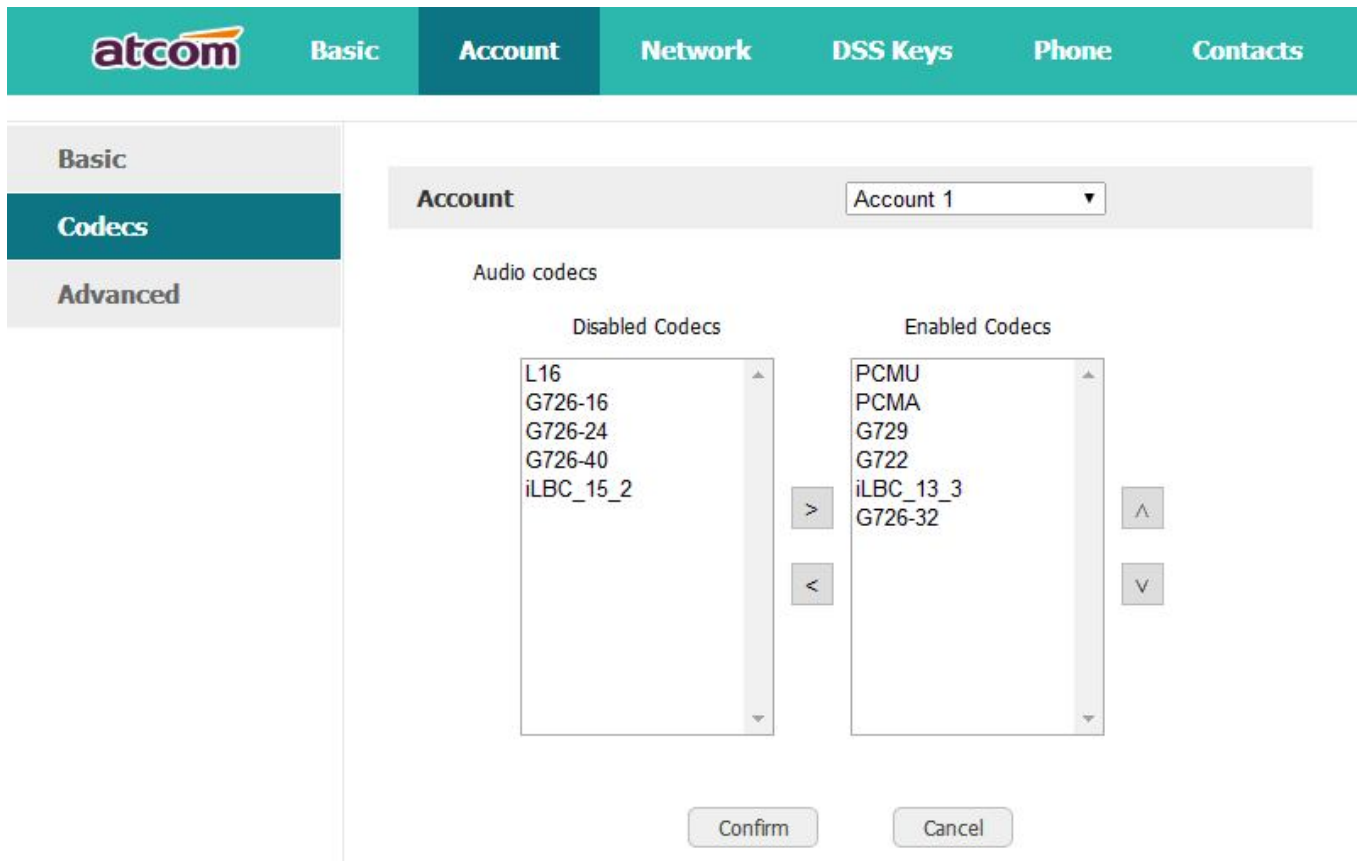

The phone is not operating within the given time, automatically enter the screensaver interface.

4、Advanced Feature

4.1、Codecs

A48(W) support multiple codecs, users can select the codes via Web.

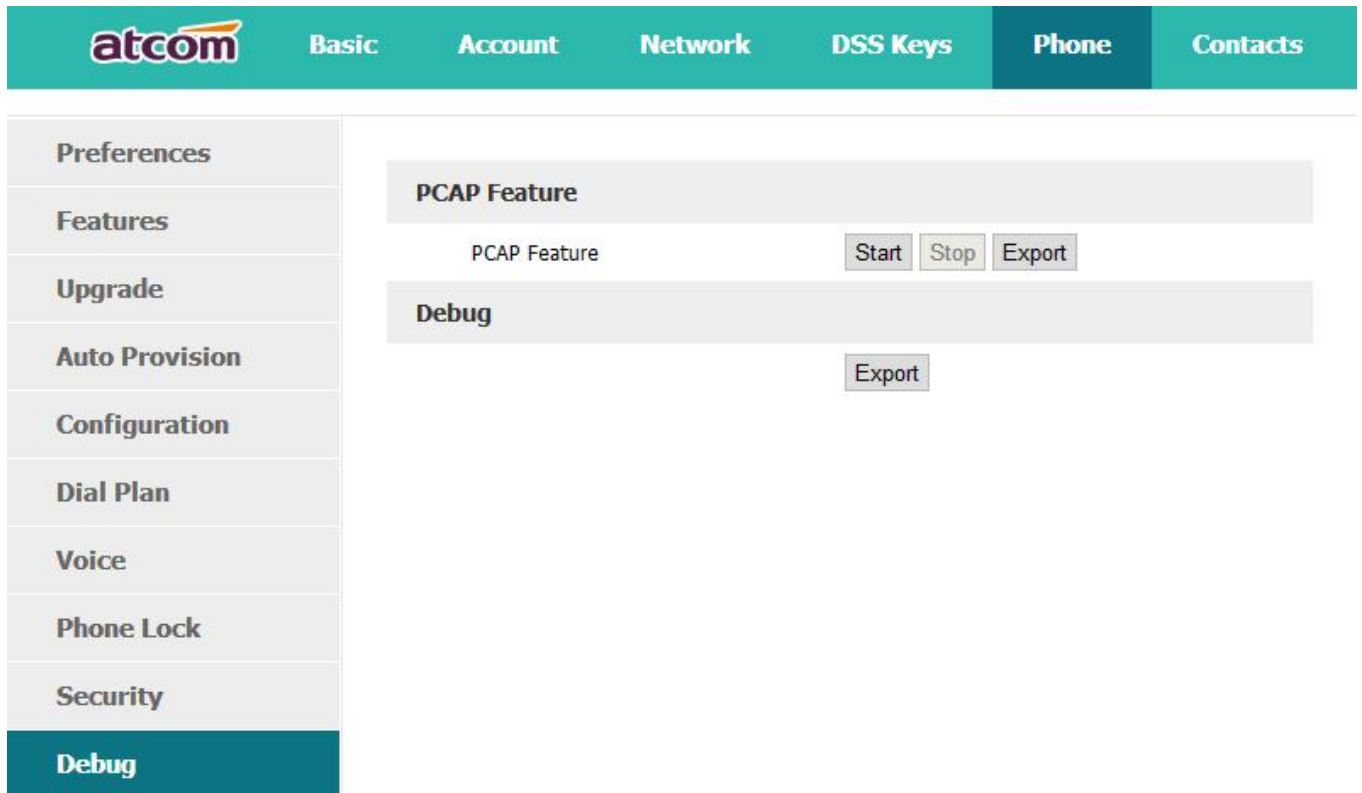

The screenshot shows the ATCOM web interface for configuring audio codecs. The top navigation bar includes 'Basic', 'Account', 'Network', 'DSS Keys', 'Phone', and 'Contacts'. The left sidebar has 'Basic', 'Codecs', and 'Advanced'. The main content area is titled 'Account' with a dropdown menu set to 'Account 1'. Under 'Audio codecs', there are two columns: 'Disabled Codes' and 'Enabled Codes'. The 'Disabled Codes' list contains L16, G726-16, G726-24, G726-40, and iLBC_15_2. The 'Enabled Codes' list contains PCMU, PCMA, G729, G722, iLBC_13_3, and G726-32. Between the lists are '>' and '<' buttons. To the right of the 'Enabled Codes' list are '^' and 'v' buttons. At the bottom are 'Confirm' and 'Cancel' buttons.

> means to enable the item of “Disabled Codes” , < means to disable the item of “EnabledCodes” ; click the button ^ or v to sort all enabled codes, the top item has the highest priority.

Note: Multiple different items of G726, iLBC should not activated simultaneously.

4.2、 Capture and Upgrading

The screenshot displays the atcom web interface. At the top, there is a teal navigation bar with the atcom logo on the left and menu items: Basic, Account, Network, DSS Keys, Phone, and Contacts. Below this is a vertical sidebar menu with the following items: Preferences, Features, Upgrade, Auto Provision, Configuration, Dial Plan, Voice, Phone Lock, Security, and Debug (which is highlighted in a darker teal). The main content area is divided into two sections. The first section is titled "PCAP Feature" and contains a label "PCAP Feature" followed by three buttons: "Start", "Stop", and "Export". The second section is titled "Debug" and contains a single "Export" button.

Click the button " Start" to start the capture and click the button "Stop" to end the capture. Then click the button "export" to download the capture file.

Item	Description
Pnp Active	Select "On" or "Off" to enable or disable PNP automatic updates
DHCP Active	Select "On" or "Off" to enable or disable DHCP option automatic updates
Provisioning Server	The address to save control file for auto upgrading, it can filled by http、https、tftp server、ftp server, for example, tftp://192.168.1.111
User Name	The username to access the file server
Password	The password to access the file server
Common AES Key	Configures the plaintext AES key for decrypting the Common CFG file
MAC-oriented AES KEY	Configures the plaintext AES key for decrypting the MAC-oriented CFG file
Check New Config	If set this parameter as "On", the phone will do some check for

	upgrading, and it will upgrade automatically once the conditions are met
Repeatedly	If set this parameter as "On", the phone will do some check for upgrading after "Interval(minutes)", and it will upgrade automatically once the conditions are met
Interval(minutes)	This parameter is configurable once the Repeatedly is "On"
Weekly	If set this parameter as "On", the phone will do the check for upgrading at a certain time in every week
Time	The time range that the phone do the check for upgrading every week, and it's configurable once the Repeatedly is "On"
Day of week	The day of week that the phone do the check for upgrading every week, and it's configurable once the Repeatedly is "On"

4.4、 Export & Import configuration file

If user wants to set the same configuration on multiple phones, there is an easy way that export the configuration file from one phone and then import this file into other phones. This operation can be completed via Web only.

Note: This operation is available for the same models only.

Import / Export Config

Import File  Choose file No file chosen

Export User Data

4.4.1、 Export configuration file

There is two ways to export the configuration files,

- Don't check the "Export User Data" and click "Export" directly, it will export the template of the configuration file;
- Check the "Export User Data" and then click "Export", it will export a configuration file that carries with user's configured data.

To modify the exported configuration file, you should to decompress it until you get a file names as configuration.

Name	Date modified	Size
configuration	2014/10/10 11:14	
config.tar.gz	2014/10/10 11:14	9 KB

The content of configuration file listed as below,

Name	Date modified	Type	Size
Calllist	2014/10/10 11:14	File folder	
Contacts	2014/10/10 11:14	File folder	
DialRule	2014/10/10 11:14	File folder	
Features	2014/10/10 11:14	File folder	
Network	2014/10/10 11:14	File folder	
Phone	2014/10/10 11:14	File folder	
Setting	2014/10/10 11:14	File folder	
voip	2014/10/10 11:14	File folder	

4.4.2、 Import configuration file

Click the button "Choose file" to select the target file for importing, and then click the button "Import". The phone will be rebooted a couple of minutes later, and import successfully.

Note: If some part of the configuration file has been modified manually, it must be re-compressed as the format of "tar.gz".

4.5、 Export System log

When the phone doesn't working well, System log is the best assistant tools for troubleshooting, all operation details has been recorded. This operation is available via Web only.

Export System Log

Log Location Local Server ?

Server Name

Log Level

Item	Description
Log Location	You can import the system log to local PC or remote Server.
Server Name	User must fill the address of server if you choose to export the system log to remote server.
Log Level	It defines the detail of system log as 5 different levels, Fatal, Error, Warning, Info, and Debug. The Debug level is the most detailed.

4.6、Dial plan

The customized Dial Plan are available on Rainbow 4 (s) , for example , the rule of replacement, Instant Calling, Area code, Restriction of Outbound.

Before customizing the dial plan, user must learn the basic grammar as below,

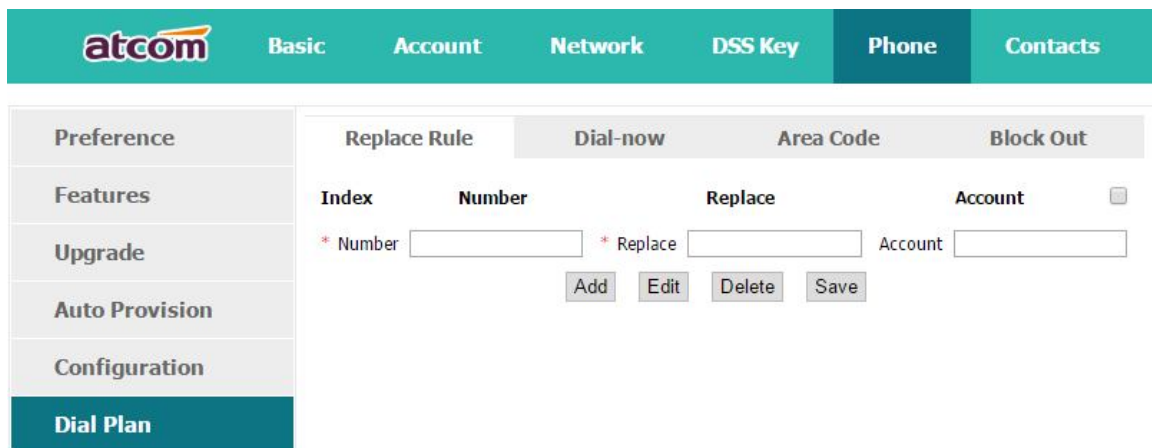

.	Represent a character or multiple ones, e.g., "6." can match "66", "678", "6plus" and so on
x	Represent one character, e.g., "6x" can match "61", "62", " 6s" and so on
[]	Represent a character in one range, e.g., " 83[0-5]18618" can match "83018618", "83488618" and so on
()	Represent the combination of characters, e.g., "([1-9])([2-7])3" can match "923", "153", "773" and so on

\$	Add a number after the character "\$" to define the location of the characters, e.g., use the prefix " 8([1-3])(.)" to replace "7\$2", the phone will call "7837" after dialing out "82837"
----	---

Note: Any operations (add, modify or delete) on the current dial plan will be not effective until click "Save".

4.6.1、 Replace Rule

Dial plan "Replace Rule" means to replace a batch of complicated character string by some simple characters, to make a speed dial.

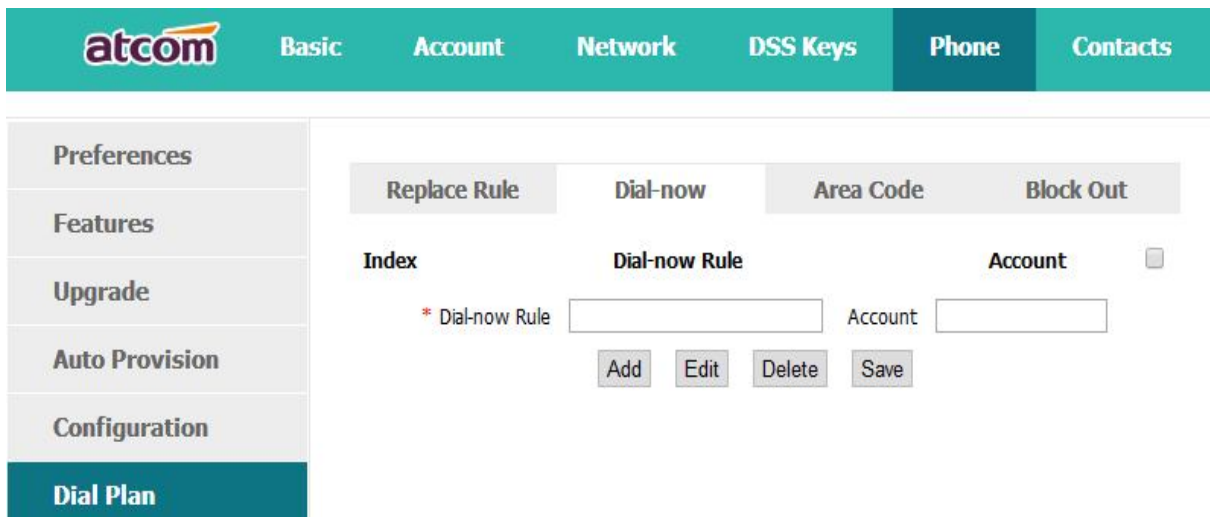

Item	Description	Sample
Number	The string works as replacer, not null	Set Number as "6",
Replace	The string that to be replaced, not null	Set Replace as "6032",
Account	The account to apply this dial plan, blank or 1 to 6 is valid. Number 1 to 6 means account 1 to 6. If you want to apply this rule to account 1、 3 and 4, just type in 1,3,4 ; And if keep it as blank, it means applying this dial plan to all accounts	Set Account as "1,3,4". It means when dial 6, the phone will dial 6032 via the 1st available line in account 1,3,and 4 automatically
Add	Multiply replace rules can be configured in one phone, after one replace dial plan configured, click this button to add a new one	

Edit	The existed replace dial plans are editable. The specified dial plan should be selected until it is covered with orange and the input fields "Number" and "Replace" shows the details correctly. After modifying, click button "Edit" to make it to be effect	
Delete	Delete one added or saved replace dial plan or multiple ones, click the frame after the specified replace dial plan before delete it, and then click button "Delete"	
Save	Any alteration won't take effect until the button "Save" is clicked.	

4.6.2、Dial-now

Dial plan "Dial-now" permits the corresponding phone to be dialed instantly without pressing the soft key "Dial", once the input has been matched. It works like a hotline.

Item	Description	Sample
Dial-now Rule	The string to be dialed out automatically by the phone	Set "Dial-now Rule" as 6xxx, keep

Account	The account to apply this dial plan, blank or 1 to 6 is valid. Number 1 to 6 means account 1 to 6. If you want to apply this rule to account 1、3 and 4, just type in 1,3,4 ; And if keep it as blank, it means applying this dial plan to all accounts	“Account” as null It means the phone will use the 1st available account to call 6033 after “Dial-now Time-out” seconds when inputting four figures begin with 6
Add	Multiply dial-now rules can be configured in one phone, after one dial-now dial plan configured, click this button to add a new one	Note: Dial-now rule is different with hotline. The Dial-now rule will take effect when input numbers matches the dial plan, and hotline takes effect in situation that the phone is in dialing state
Edit	The existed dial-now dial plans are editable. The specified dial plan should be selected until it is covered with orange and the input fields “Number” and “Dial-now” shows the details correctly. After modifying, click button “Edit” to make it to be effect	
Delete	Delete one added or saved dial-now dial plan or multiple ones, click the frame after the specified dial-now dial plan before delete it, and then click button “Delete”	
Save	Any alteration won’t take effect until the button “Save” is clicked.	

Set “Dial-now Time-out” via web: **Phone→Features→General Information→Dial-now Time-out (secs).**

4.6.3、 Area Code

Dial plan “Area Code” has been defined to identify each different area. To call a phone number of other areas, user must add the area code to be in front of the phone number. For convenience, area code has been recommended to be configured while frequently dialing to that type of phone number.

atcom						
Basic		Account	Network	DSS Key	Phone	Contacts
Preference	Replace Rule	Dial-now	Area Code	Block Out		
Features	Code	<input type="text"/>	<input type="text"/>	<input type="text"/>		
Upgrade	Minimum length	<input type="text" value="8"/>	<input type="text" value="15"/>	<input type="text"/>	(1~15)	(1~15)
Auto Provision	Maximum length	<input type="text" value="15"/>	<input type="text" value="8"/>	<input type="text"/>	(1~15)	(1~15)
Configuration	Account	<input type="text"/>	<input type="text"/>	<input type="text"/>		
Dial Plan			<input type="text"/>			
		<input type="button" value="Confirm"/>	<input type="button" value="Cancel"/>			

Item	Description	Sample
Code	The area code dialed before the number	Set "Code" as "0086577", Set "Account" as "5",
Minimum length	The minimum length of the number input to activate the area code dial plan	Set "Minimum length" as "5".
Maximum length	The maximum length of the number input to activate the area code dial plan	It means when dialing 83018618 with the 5 th account, the phone will dial 0086577 before it.
Account	The account to apply this dial plan, blank or 1 to 6 is valid. Number 1 to 6 means account 1 to 6. If you want to apply this rule to account 1、3 and 4, just type in 1,3,4 ; And if keep it as blank, it means applying this dial plan to all accounts	Note: If the length of the number input in the dial UI is not between minimum length and the maximum length, area code will not take effect
Confirm	Apply this dial plan	
Cancel	Recover all input fields to the state that saved at latest time	

4.6.4、Block Out

Dial plan "Block out" is used to prohibit the phone number outgoing call from some accounts.

atcom Basic Account Network DSS Keys **Phone** Contacts

- Preferences
- Features
- Upgrade
- Auto Provision
- Configuration
- Dial Plan**
- Voice
- Phone Lock
- Security
- Debug

Replace Rule	Dial-now	Area Code	Block Out
Block Out Number1	<input type="text"/>	Account	<input type="text"/>
Block Out Number2	<input type="text"/>	Account	<input type="text"/>
Block Out Number3	<input type="text"/>	Account	<input type="text"/>
Block Out Number4	<input type="text"/>	Account	<input type="text"/>
Block Out Number5	<input type="text"/>	Account	<input type="text"/>
Block Out Number6	<input type="text"/>	Account	<input type="text"/>
Block Out Number7	<input type="text"/>	Account	<input type="text"/>
Block Out Number8	<input type="text"/>	Account	<input type="text"/>
Block Out Number9	<input type="text"/>	Account	<input type="text"/>
Block Out Number10	<input type="text"/>	Account	<input type="text"/>

Iten	Description	Sample
Block Out Number	The number that prohibited	Set "Block Out Number 1"as"10086"
Account	The account to apply this dial plan, blank or 1 to 6 is valid. Number 1 to 6 means account 1 to 6. If you want to apply this rule to account 1、 3 and 4,just type in 1,3,4 ;And if keep it as blank, it means applying this dial plan to all accounts	Set "Account" as "2,4,6" It means the phone will enter the "Call End" UI when dial "10086" with account 2, 4 or 6
Confirm	Apply this dial plan	
Cancel	Recover all input fields to the state that saved at latest time	

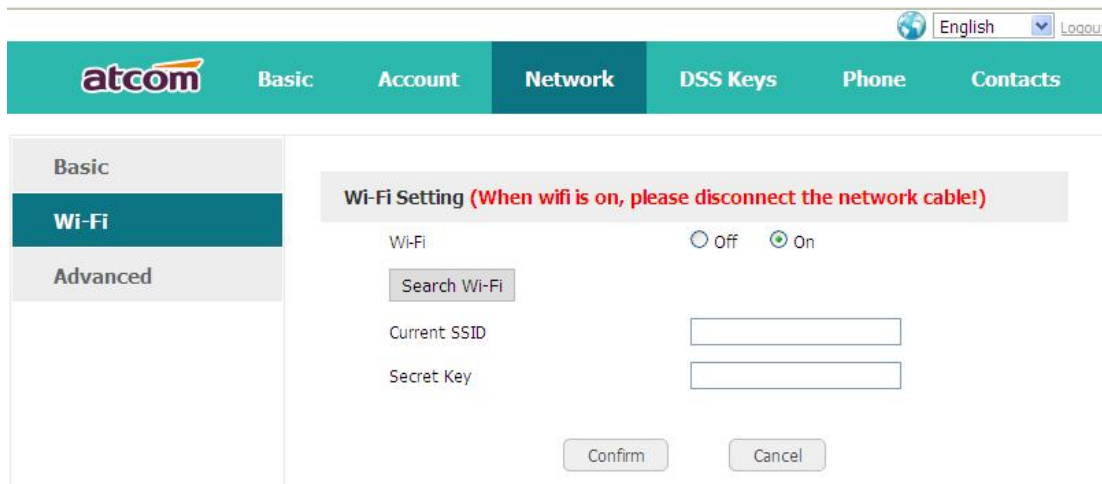

5、WI-FI(only for A48W)

5.1、 Configure the wifi on the phone

- 1、 Press  "Menu"-**"Settings"**-**"Advanced Settings"**-**"Network"**-**"Connect Mode"**, change for the wifi connection mode,press **"Save"**.
- 2、 Press  "Menu"-**"Settings"**-**"Advanced Settings"**-**"Network"**-**"WIFI setting"**-**"WLAN"**choose the wifi you want to connect,Press **"Connect"**,then input the correct wifi password.
- 3、 Return to the standby interface,and phone successful connected to the wifi.

5.2、 Configure the wifi on the WEB

A48W connect to network via Wi-Fi acquiescently, click **"Search Wi-Fi"** button to search the available Wi-Fi.

The screenshot shows the ATCOM web interface for configuring Wi-Fi settings. The top navigation bar includes the ATCOM logo and tabs for Basic, Account, Network, DSS Keys, Phone, and Contacts. The 'Network' tab is selected. On the left, a sidebar menu shows 'Basic', 'Wi-Fi', and 'Advanced' options, with 'Wi-Fi' selected. The main content area is titled 'Wi-Fi Setting (When wifi is on, please disconnect the network cable!)'. It features a 'Wi-Fi' toggle switch set to 'On', a 'Search Wi-Fi' button, and input fields for 'Current SSID' and 'Secret Key'. At the bottom, there are 'Confirm' and 'Cancel' buttons. The top right corner of the interface shows 'English' and a 'Logout' link.

After all available Wi-Fi hotspots are list out, click the round behind the available Wi-Fi which you want to connect.

Index	SSID	Signal	Select
1	cisco	211	<input type="radio"/>
2	360	207	<input type="radio"/>
3	re	207	<input type="radio"/>
4	amoji	205	<input type="radio"/>
5	CHINA TELECOM	205	<input type="radio"/>
6	360_____WIFI-C9	197	<input type="radio"/>
7	_____	197	<input type="radio"/>
8	_____	190	<input type="radio"/>
9	inWatch3	189	<input type="radio"/>
10	ChinaNet-7A6t	188	<input type="radio"/>
11	360_____WIFI-9F	185	<input type="radio"/>
12	iTV-7A6t	185	<input type="radio"/>
13	inWatch2	185	<input type="radio"/>
14	Royale International China	184	<input type="radio"/>

Input the right **"Secret Key"** and then click the **"Confirm"** button, the phone will reboot, after rebooting, the Wi-Fi icon will display on the home screen, it means connect failed when the icon come with , then you should check the configuration. if the icon come with , it means connect successfully.

6、FAQ

6.1、How to reset to factory

There are 3 methods for factory reset:

1. Factory reset via phone:

- a) Press the key 
- b) Select "Settings", then press the soft key "Enter"
- c) Select "Advanced Settings", then press the soft key "Enter"
- d) Input the access password, then press the soft key "Enter"
- e) Select "Reset to factory", then press the soft key "Enter"
- f) Press the soft key "OK", then the phone will be reboot and resumed to factory default settings

2. Factory reset via Web:

- a) Key in the IP address of phone with a browser,
 - b) Access the webpage of phone as the role of "admin", username/password is admin/admin.
 - c) Select "Phone"
 - d) Select "Upgrade"
 - e) Click the button "Reset to Factory"
 - f) Click the button "OK"
3. Factory reset during starting:
- a) Hold the key "*" and "#" while power on for 5 seconds
 - b) The phone will be reboot and resumed to factory default setting

6.2、 Upgrade the firmware on safe mode

If the phone can't be started successfully, user is able to upgrade the firmware on post mode,

- a) Setup a TFTP Server and set the PC's IP address as "192.168.1.200"
- b) Copy the firmware file we supplied to the root menu of TFTP Server, modify the file's name as A48(W).tar.gz and decompress it, then modify the corresponding file's name as A48(W).kn, A48(W).fs, A48(W).fw, A48(W).lg
- c) Ensure the TFTP Server and phone are connected to the same network switch and both reachable
- d) Long Press the key "*" and "1" to upgrade the kernel file, long Press the key "*" and "2" to upgrade the firmware file, long Press the key "#" to upgrade the App file, long Press the key "*" and "4" to upgrade the logo file, and then plug in power until "upgrading..." displayed on LCD
- e) The phone will start downloading file from TFTP server
- f) After downloading completed, the phone will be automatically upgraded
- g) After upgrading completed, the phone will be started with the factory default settings

6.3、 How to make IP Peer to Peer call

To make a IP peer to peer call, user should press "*" to input "." that in the IP address. For example, to dial "192.168.1.100", just need input "192","*","168", "*", "1", "*", "100".

7、 Troubleshooting

7.1、 Thephone is failed to register to SIP server

1. First of all, check the IP address. If the LAN port is DHCP, please ensure the DHCP server has been enabled.
2. Check the network gateway
3. Check the DNS
4. Make sure the input account matched the one provided by Service Provider
5. Make sure SIP Server has been enabled already
6. Make sure the Port of SIP Server, it's 5060 by default

7.2、 Thephone is failed to gain IP address

1. Make sure the network cable has been plugged into the LAN port
2. Make sure the network cable or port of network switch are working fine,

3. Make sure the DHCP server has been enabled, and there are available IP address
4. Try to set the LAN port as Statics IP

7.3、 Only one party can hear from another on calling

1. Try to make a IP peer to peer call, to make sure the mic and speaker are working fine
2. Enable STUN via Web
3. Set the address of STUN Server, for example stun.sipgate.com
4. Present this operation above and the phone will be reboot
5. Try to make a normal call again

8、 Abbreviation

DND: Do Not Disturb

CFWD: Call Forward

Bxfer: Blind Transfer

Conf: Conference

Num: Number
