

Ultra-elegant Gigabit IP Phone

SIP VP-T49G

Quick Start Guide (V80.11)

Packaging Contents

The following items are included in your package. If you find anything missing, contact your system administrator.

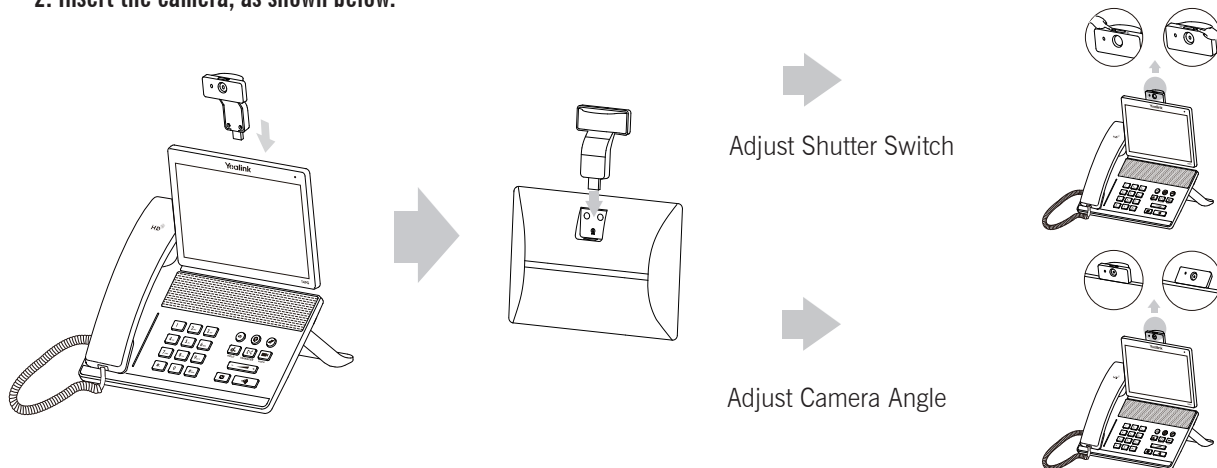

Assembling the Phone

1. Attach the stand, as shown below:

2. Insert the camera, as shown below:

3. Connect the handset and optional headset, as shown below:

Note: The headset should be purchased separately.

4. Connect the optional USB flash drive, as shown below:

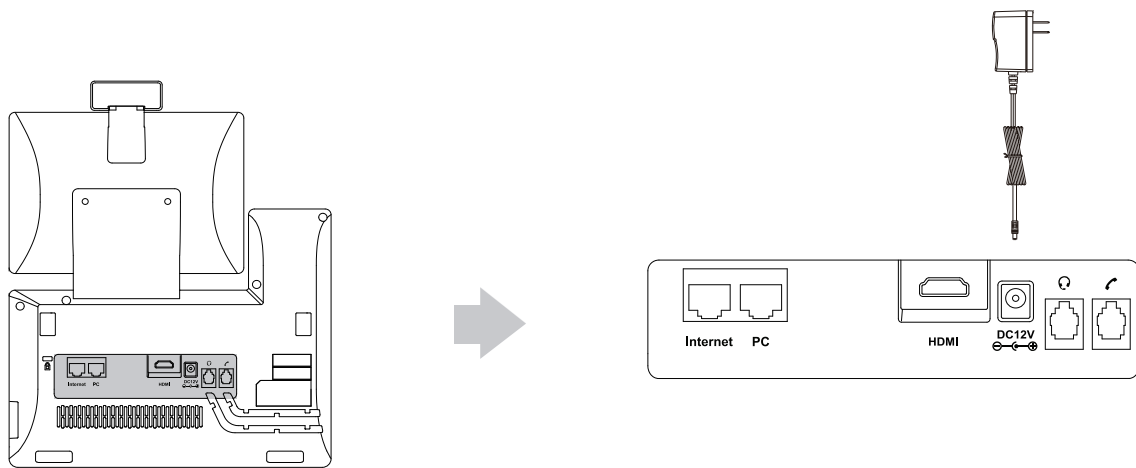

5. Connect the external monitor and attach the camera to the external monitor, as shown below:

- Steps :
- 1 Remove one piece of the fastener's liner; take the gap of the camera as the touchline and attach to the camera from the top; connect one end of the USB3.0 cable to the camera.
 - 2 Remove the other piece of the fastener's liner; attach to the external monitor; attach the camera to the external monitor by pressing two sides of Dual Lock together. Make sure the camera is vertical and not askew otherwise the near-site video image will be crooked. You are advised to attach the camera to the external monitor whose back is straight.
 - 3 Connect the other end of the USB3.0 cable to the IP phone.
 - 4 Connect one end of the HDMI cable to the HDMI port on the phone, and connect the other end to the HDMI port on the external monitor.

6. Connect the AC power, as shown below:

Note: The IP phone should be used with Yealink original power adapter (12V/2A) only.

7. Connect to the network, as shown below:

You have two options for network connection. You can select one of them according to the current office environment.

a) Connect to the wired network:

b) Connect to the wireless network:

1) Tap  -> **Basic** -> **Wi-Fi**.

2) Tap **On** from the radio box of **Wi-Fi**.

The phone will automatically search for available wireless networks in your area.

3) Select an available wireless network from the list of networks.

4) If the network is secure, enter its password in the **PIN** field.

5) Tap **OK** to connect to the wireless network.

Startup

After the IP phone is connected to the network and supplied with power, it automatically begins the initialization process. After startup, the phone is ready for use. You can configure the phone via web user interface or phone user interface.

Welcome

initializing... Please wait

Configuring Your Phone

Configuring via web user interface

Accessing the web user interface:

1. Tap  -> **Status** when the phone is idle to obtain the IP address of the phone.
2. Open a web browser on your computer, enter the IP address into the address bar (e.g., "http://192.168.0.10" or "192.168.0.10"), and then press **Enter**.
3. Enter the user name (default: admin) and password (default: admin) in the login page and click **Confirm**.

Network Settings: Click on **Network->Basic->IPv4 Config**

You can configure the network settings in the following ways:

DHCP: By default, the phone attempts to contact a DHCP server in your network to obtain its valid network settings, e.g., IP address, subnet mask, gateway address and DNS address.

Static IP Address: If the phone cannot contact a DHCP server for any reason, you need to configure IP address, subnet mask, gateway address, primary DNS address and secondary DNS address for the phone manually.

PPPoE: If you are using an xDSL modem, you can connect your phone to the Internet via PPPoE mode. Contact the ITSP for the user name and password.

Note: The IP phone also supports IPv6, but IPv6 is disabled by default.

Account Settings: Click on **Account->Register->Account X (X=1,2,3...15,16)**

Parameters of the account:

Register Status:	It shows the register status of the current account.
Line Active:	You can select Enabled/Disabled to enable/disable the account.
Label:	It is shown on the touch screen to identify the account.
Display Name:	It is shown as Caller ID when placing a call.
Register Name:	It is an authenticated ID for authentication provided by ITSP (required).
User Name:	It is provided by ITSP for registration (required).
Password:	It is provided by ITSP for registration (required).
Server Host:	It is provided by ITSP for registration (required).

Register status icons on the touch screen:

(Green) Registered

(Gray) Register Failed

(Green and Flashing) Registering

Note: Check with your system administrator if any error appears during the registration process or a specific configuration is required for your registration.

Configuring via phone user interface

Network Settings:

When the phone is idle, tap -> **Advanced** (default password: admin)-> **Network**-> **WAN Port/VLAN/Webserver Type /802.1x/ VPN/ LLDP/CDP/NAT** to configure the network.

Account Settings:

When the phone is idle, tap -> **Advanced** (default password: admin)-> **Account** to configure the account.
